LIST OF ACRONYMS

ABTC	Animal Bite Treatment Center
AO	Administrative Order
BEMONC	Basic Emergency Obstetric and Newborn Care
BHS	Barangay Health Station
BTL	Bilateral Tubal Ligation
CHO	City Health Office
CV	Central Visayas
CV CHD	Central Visayas Center for Health Development
CV HRS	Central Visayas Health Referral System
DM	Department Memorandum
DOH	Department of Health
FP	Family Planning
HC	Health Center
HCPN	Health Care Provider Network
HFDU	Health Facility Development Unit
HRS	Health Referral System
HSP	Health Service Provider
ICT	Information and Communication Technology
LGU	Local Government Unit
MHO	Municipal Health Office
M&E	Monitoring and Evaluation
MLLA	Mini laparotomy under Local Anesthesia
PCF	Primary Care Facility
PCPN	Primary Care Provider Network
PDOHO	Provincial DOH Office
PHIC	Philippine Health Insurance Corporation
PHN	Public Health Nurse
PHO	Provincial Health Office
PHU	Public Health Unit
PPFP	Postpartum Family Planning
PPIUD	Postpartum Intrauterine Device Insertion
RC	Referral Committee
RHM	Rural Health Midwife
RHU	Rural Health Unit
SDN	Service Delivery Network
TWG	Technical Working Group

FOREWORD

Republic Act 11223 or the Universal Health Care (UHC) Law seeks to achieve the health system reforms necessary to expand access to quality, equitable, and affordable health services of all Filipinos and protect them against financial risks in health service utilization. This landmark legislation adopts a whole-of-system, whole-of-government, whole-of-society, and people-centered approach to improve overall health system performance. In Central Visayas (CV), one of the key measures to progressively achieve UHC is the operationalization of the regional health referral system (HRS).

The establishment of HRS in CV local governments began in 2001 when an assessment of health system performance surfaced the health systems gaps in the region such as inadequate policies and guidelines on HRS; poor access to health services due to geographical factors; inadequate health human resources; inadequate logistics and technical support; and poor knowledge, attitudes, and skills among health service providers. To address these gaps, the Central Visayas Center for Health Development (CVCHD) supported its catchment cities and provinces in streamlining their referral processes.

In 2015, to standardize referral protocols in the entire region, the CVCHD published the first edition manual of operations (MOO) of the CV HRS, which was co-developed with representatives from various healthcare organizations, including city and provincial health offices. The manual provides the protocols and mechanics in referring patients, as well as the guidelines for operationalizing the region-wide HRS.

Over the years of HRS operationalization, efforts were made to make referral process, including its monitoring and evaluation, more efficient. These efforts include digitizing referral processes. CVCHD spearheaded the upgrading from paper-based to electronic referral system in the latter part of 2019. With this major innovative transition, and the need to recalibrate referral processes to align with UHC requirements, particularly for the health care provider network service delivery design, it became imperative to update the CV HRS MOO. Moreover, the advent of the COVID-19 pandemic and the continuous occurrence of disasters and calamities in the country highlighted that HRS processes should appropriately cover effective response to public health emergencies.

This CV HRS second edition MOO is conceptualized as a powerful tool in the operationalization of the upgraded referral system which aims to strengthen collaborations across health care organizations and local governments to improve health and save lives. It is a heartfelt reminder that securing people's health leads to creating healthy and progressive communities – the ultimate goal of Ambisyon Natin 2040.

Jaime S. Bernadas, MD, MGM, CESO III
Regional Director
DOH-Regional Office VII

MESSAGE FROM THE OFFICE OF HEALTH, UNITED STATES AGENCY FOR INTERNATIONAL DEVELOPMENT (USAID) - PHILIPPINES

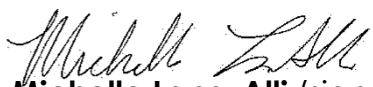

Congratulations to the Department of Health (DOH) Central Visayas Center for Health Development (CVCHD) and partners for their outstanding work on publishing the Second Edition of the Central Visayas Regional Health Referral System Manual.

This publication is a testament to the continuous improvement of our public health system and a major step towards achieving fully functional and cohesive regional health systems in the Central Visayas.

A functional referral system incorporates an integrated health system as envisioned in the Universal Health Coverage Law. It also includes appropriate referrals as a critical component of quality clinical care, ensuring an optimal flow of patients among healthcare providers at all levels of the healthcare system.

USAID is proud to be a part of this endeavor towards seamlessly providing healthcare for Filipinos. Guided by our shared vision of a stronger health system focused on equity, quality, and resource optimization for better health for all, USAID will continue to work with the Department of Health and its various partners in the private sector, civil society organizations, and other local stakeholders in bolstering the region's health system.

We wish all of you the best in your journey towards achieving Universal Healthcare in the Philippines!

Michelle Lang-Alli (signed)
Director, Office of Health
USAID/Philippines

ACKNOWLEDGEMENT

The Department of Health (DOH) Central Visayas Center for Health Development (CVCHD) expresses its deepest appreciation to the members of the Technical Working Group (TWG) of the Regional Health Referral System (RHS) for their tireless efforts in developing this Second Edition of the Central Visayas Regional Health Referral System Manual.

The TWG is composed of:

Chairperson	:	Dr. Jera C. Armendarez
Vice Chairperson	:	Dr. Nelher D. Omus
Members	:	Dr. Eugenia Mercedes R. Cañal Dr. Shelbay G. Blanco Dr. Annessa P. Patindol Ms. Jane Michelle E. Raagas Ms. Chevroleta C. Deiparine Ms. Ligaya I. Moneva Mr. Gerwin D. Gorosin

The CVCHD also extends its deep gratitude to the provincial, city, and municipal health officers; chiefs of both DOH-retained and local government unit hospitals; and the local health boards in Central Visayas for their feedback and inputs to further refine this manual.

This same appreciation is also extended to Dr. Mari Leo Fidel T. Pataray MD, FPCP, the Medical Specialist IV and Vicente Sotto Memorial Medical Center Health Referral Point Person for his constant feedback of the daily status in the utilization of the RHS.

Finally, the guidance and valuable inputs of the USAID's ReachHealth Project in the manual review and development process is hereby acknowledged with gratitude.

ABOUT THE MANUAL

As Central Visayas (CV) gears toward ensuring the functionality and efficiency of referral mechanisms in all cities and provinces across the region, the CV Center for Health Development (CHD), in collaboration with various healthcare organizations and different levels of health facilities in the region, developed this manual of operations. This compendium of operational documents contains the agreed upon activities in operationalizing the Central Visayas Health Referral System (CVHRS), including the implementation of its e-referral system. It also provides the: (1) structure of the referral network, (2) standard referral tools, (3) guiding principles in referral, (4) referral protocols, and (5) other operational details of the referral system.

This manual was developed considering the diverse situations and health service delivery structures of the cities and provinces in CV; the perspectives of different stakeholders, including the provincial/city/municipal health offices, public and private hospitals of varying functional capacities, and health centers and rural health units; and the recommended service delivery design of health care provider networks (HCPNs). While it was deliberately made as comprehensive as possible, the developers of this manual do not claim that it will respond to all nuances and needs in the local context. Thus, HCPNs can either adopt it as is or supplement it with local guidelines as needed. Nonetheless, the general guidelines and referral processes contained herein are considered standard and should be complied with by all health facilities in the region's HCPNs. As such, supplementary guidelines should be made only to provide details of local arrangements in operationalizing the referral system.

The contents of this manual are divided into the following sections:

Introduction – presents the history, overview, purpose, and objectives of the CVHRS.

Referral System Framework, Concepts, and Principles – discusses the definition, types, purpose, and standards of referral.

Operationalizing the Central Visayas Health Referral System – provides the structure and implementation arrangements of CVHRS. It also discusses the features and operational details of e-referral.

Referral Guidelines – provides the step-by-step process in conducting referral – from pre-referral stage to post-referral stage. It also presents the referral protocols for medico-legal cases and mass casualties.

Referral System Monitoring and Evaluation – presents M&E as a critical component in ensuring the functionality, efficiency, and continuous improvement of the referral system.

The target users of this manual include health service providers from different levels of health facilities in CV, technical and administrative staff of city and provincial health offices, and relevant employees of CVCHD.

INTRODUCTION

Health is recognized as a basic human right by the 1987 Philippine Constitution, which specifically stipulates that “*the State shall protect and promote the right to health of the people and instill health consciousness among them*”. In consonance with this constitutional provision, the Philippine government enacted Republic Act 11223 or the so-called Universal Health Care (UHC) Law, which aims to make quality health services accessible to all Filipinos regardless of socio-economic status. This landmark legislation seeks to progressively realize UHC in the country by adopting a whole-of-system, whole-of-government, whole-of-society, and people-centered approaches to improve overall health system performance.

One of the measures identified to improve health system performance is the establishment or strengthening of Health Referral Systems (HRS). Through this, health facilities will be able to effectively coordinate the delivery of appropriate health services to the right client matched and linked with the right facility.

Establishment of Central Visayas Health Referral System

The establishment of HRS in Central Visayas (CV) began in 2001. It started with a baseline assessment of referral practices and identification of deterrents for the successful implementation of a functional health system. This DOH-led assessment found that lack of concrete policies and guidelines on referral; poor access to health services due to geographical challenges; inadequate health human resources; inadequate logistics and technical support for health programs and services; and gaps in knowledge, attitudes, and skills of health service providers (HSPs) hinder local health systems from efficiently delivering quality health services. As part of the efforts to address these health systems gaps, various activities were conducted to establish a functional referral system in all local government units in the region. Specifically, seminars, training, workshops, and consultative meetings were held to help cities and provinces systematize their referral processes and standardize their referral tools. However, problems in care coordination persisted, especially between cities and provinces where geo-political barriers usually confront HSPs whenever they refer patients. To address this, the CV CHD spearheaded the establishment of a regional HRS called the Central Visayas Health Referral System (CVHRS). This region-wide system sought to strengthen and institutionalize processes that ensure consistent and continuous coordination and collaboration among all health facilities in the region in delivering health services based on their respective capacities. Through this, they sought to reliably provide timely and appropriate care to the right patient in the right health facility.

In 2015, CVCHD published the first edition referral manual of Central Visayas. This manual served as a guide and reference for HSPs in the proper conduct of referral. It provided protocols and mechanics in referring patients; directory of health services and facilities; policies and guidelines on medico-legal cases and deaths; standard referral forms; identified point persons for the HRS; creation of the HRS Committee/Team; communication arrangements; referral system monitoring and evaluation (M&E); and guidelines in transporting patients, among others.

However, despite the development and dissemination of the manual, gaps in implementation persisted. The paper-based referral system was confronted with

inadequacy of case management information during referral, lost or misplaced paper records, and non-completion of the two-way referral, resulting in poor health care. Additionally, the lack of effective communication and coordination system led to uncoordinated, untracked, and incomplete referrals. However, these gaps were incompletely documented as HRS monitoring and evaluation mechanisms were not fully established and implemented. To resolve these problems, the region gradually transitioned to digitizing referral mechanisms. Through this, communication, feedback, and M&E mechanisms are integrated into the referral tools, thereby making the referral process more efficient.

Digitization of Referrals

The use of information and communication technology (ICT) in health systems is a viable way to streamline care coordination and referral processes. Thus, CVCHD decided to upgrade the paper based HRS to an electronic referral system. Digitization efforts started in January 2018. High-tech equipment, gadgets, and office space for the ICT Unit were provided and ICT personnel were designated for the digitization effort to push through.

Moreover, to fully operationalize the e-referral system, CVCHD issued Regional Circular No. 34-A, s. of 2020. This policy seeks to mainstream the implementation of the electronic CVHRS in all health facilities in the region. In the initial stage of e-referral system implementation, the ICT Unit, which is tasked to develop and continuously upgrade the system, and the Health Facility Development Unit (HFDU), which facilitates its roll out and the regional implementation of HRS, organized a technical working group (TWG) through Committee Memorandum Order No. 08, s. of 2021. The TWG is tasked to work on the continuous enhancement, effective implementation, and sustainability of the e-referral system in all health facilities. Meanwhile, the Vicente Sotto Memorial Medical Center, the apex referral facility of the entire region was tapped to assist CVCHD in operational monitoring and technical assistance provision on HRS through Memorandum No. 67 s. of 2021.

Revision of Referral Manual

Transitioning from a paper-based HRS to an e-referral system required updating of the first edition regional referral manual to accommodate adjustments to referral processes brought about by digitization. Moreover, with the advent of the UHC Law, referral structures and protocols had to be recalibrated following the HCPN service delivery design, which highlights primary-care-based navigation and care coordination.

CVCHD, in collaboration with various stakeholders, spearheaded the development of this second edition referral manual. This enhanced document does not only contain updates brought about by digitization and UHC Law implementation but was deliberately designed as well to respond to the following gaps and challenges in local health systems, which were encountered by the region in the earlier years of the regional HRS.

1. Referral processes, when inefficient and unclear, are prone to breakdowns, which can result in lack of continuity of care, delays in service delivery, and dissatisfaction among practitioners and patients.

2. Confusions in referral processes negatively affect working relationships among primary, secondary, and tertiary health care settings.
3. Poor communication and coordination of care between primary care and specialty care providers leads to major inefficiencies in health care delivery.
4. Lack of proper matching of cases with appropriate facilities results in congestion in high-level hospitals as lower-level facilities tend to directly refer patients to them regardless of the classification of patient condition (whether needing generalist, specialist, or sub-specialist care).
5. Bypassing primary health care has become a routine in many areas, resulting in underutilization and overutilization in lower and upper levels of health care delivery, respectively.
6. Lack of integration in the health system has caused difficulties to provide a smooth flow of patient information in a timely and structured manner.
7. Cooperation does not exist between general practice and specialty centers which is a prerequisite of satisfactory medical and obstetric care.

By streamlining referral protocols considering the varying situations of LGUs in the region and the perspectives of different levels of health facilities in CVHRS, the above situations are hoped to be mitigated if not fully addressed. However, while a clear set of policies and procedures is critical to making a referral efficient, it does not always guarantee religious compliance of implementers in the agreed upon processes. Hence, this manual also prescribes activities on continuous monitoring, evaluation, and supervision of the HRS to constantly promote compliance to referral standards until it becomes a way of life in all health facilities in the network.

REFERRAL SYSTEM FRAMEWORK, CONCEPTS, AND PRINCIPLES

Timely and efficient delivery of care in the appropriate health facility requires strong collaboration and functional referral mechanisms among different levels of healthcare providers. This holds more accurately in local health systems in the Philippines where complementation in care is almost always imperative as no single health facility can cater to all types of clients and effectively address all patient conditions. A functional referral system makes health service provision efficient by ensuring that patients/clients are managed in the appropriate health facility – primary care facilities for those requiring primary care, general hospitals for those who need generalist care, and specialty hospitals for conditions that need specialist and subspecialist care.

Referral refers to a set of a regular daily activity of linking a patient to a needed service undertaken by a health care provider or facility in response to its inability to provide the necessary intervention to its patient's needs whether it is real or perceived. Referral is defined by the DOH as the process in which a health facility officially and appropriately transfers the management of a patient to a better or differently resourced facility and refers the patient back to the assigned primary care provider (DOH AO 2020-0019).

Section 33 of the rules and regulations implementing the Local Government Code, defines a functional referral system as "**one that ensures the continuity and complementation of health and medical services**". It involves all health facilities from primary to tertiary level. These services shall be comprehensive and shall encompass promotive, preventive, curative, rehabilitative, and palliative care.

Types of Referrals

Referrals are usually classified based on its direction – whether it is to another facility, within the same facility, or a specific level of facility.

Internal Referral takes place within the same facility – usually from one department to another (e.g., Department of Medicine refers a diabetic patient with diabetic foot to Department of Surgery) or from one health service provider to another. The usual reasons for internal referral include the following:

- To seek opinion or suggestion in care
- For co-management
- To seek further management or specialty care

External Referral occurs when a patient is referred to another health facility or institution. It may happen within a health care provider network (HCPN) or between province-wide/city-wide health systems (P/CWHS) not bound by a service level agreement. External referrals are done for the following reasons:

- **Transfer of Service** happens when the management of a patient is shifted to another health facility. It occurs when: 1) the services needed in one facility have been completed and follow up care can already be done in another; 2) the patient needs a more advanced care, whether in-patient or outpatient; 3) the needed services can be more efficiently provided by another health facility, etc.
- **Consultation** occurs when the management of a patient is retained in the referring

facility, but consultation is sought with a health service provider in another facility or institution.

- **Diagnostics and special procedures** happen when a required procedure cannot be done in the health facility that manages the patient.

External referrals are further classified based on their directions – vertical and horizontal.

Vertical referral is executed between health facilities with different functional capacity (e.g., a health center and a level 1 hospital). Referral may be from a lower to a higher-level health facility and vice versa, based on the service capability and categorization of referrals.

- **Upward referral** – done from a lower to a higher facility when a patient needs more advanced care.
- **Downward referral** – done when a patient must be referred back to the originating primary care facility, or when a service can be more efficiently provided in a lower-level facility.

Horizontal referral happens between facilities with the same functional capacity (e.g., referral between two level 1 hospitals). It is done in consideration of catchment area, availability of services (e.g., the hospital's ICU is full, so the patient is transferred to another hospital with available ICU bed), economic factors (e.g., from a private to a public hospital with the same functional capacity), etc.¹

Framework of a Health Referral System

According to the DOH AO 2020 – 0019, which provides the guidelines on HCPN service delivery design consistent with the provisions of UHC Law, the referral system shall operate within the framework of HCPN and its sub-provincial health system with the Primary Care Provider Network (PCPN) as its foundation.

HCPN is a group of primary to tertiary care providers whether public, private, or mixed offering people-centered comprehensive care in integrated and coordinated manner with the primary care provider acting as the navigator and coordinator of health care within the network.

There are three (3) types of health care provider network:

1. **Public HCPN** - is created by grouping the public primary care providers and facilities into Primary Care Provider Networks (PCPNs) that are linked to secondary and/or tertiary care providers within geographic or political boundaries.
2. **Private HCPN** - is driven by market-based forces and may not be limited to defined geo-political boundaries. It is created by grouping the private primary care providers and facilities into Primary Care Provider Networks (PCPNs) that are linked to secondary and/or tertiary care providers within geographic or political boundaries.
3. **Mixed HCPN** - both public and private entities have co-ownership of all health facilities and services within the network. Co-ownership refers to ownership of

¹ USAID's ReachHealth Project (2022) Guide in Establishing Referral System in a Health Care Provider Network

health facilities and services within a network by at least 2 or more juridical entities where the co-owners agree on their network shares.

The type of HCPN is determined by the kind of entity that is managing it. For instance, private health facilities may be engaged by the public HCPN, through contractual agreement, to provide services that are not available, but it will still be considered a public HCPN.

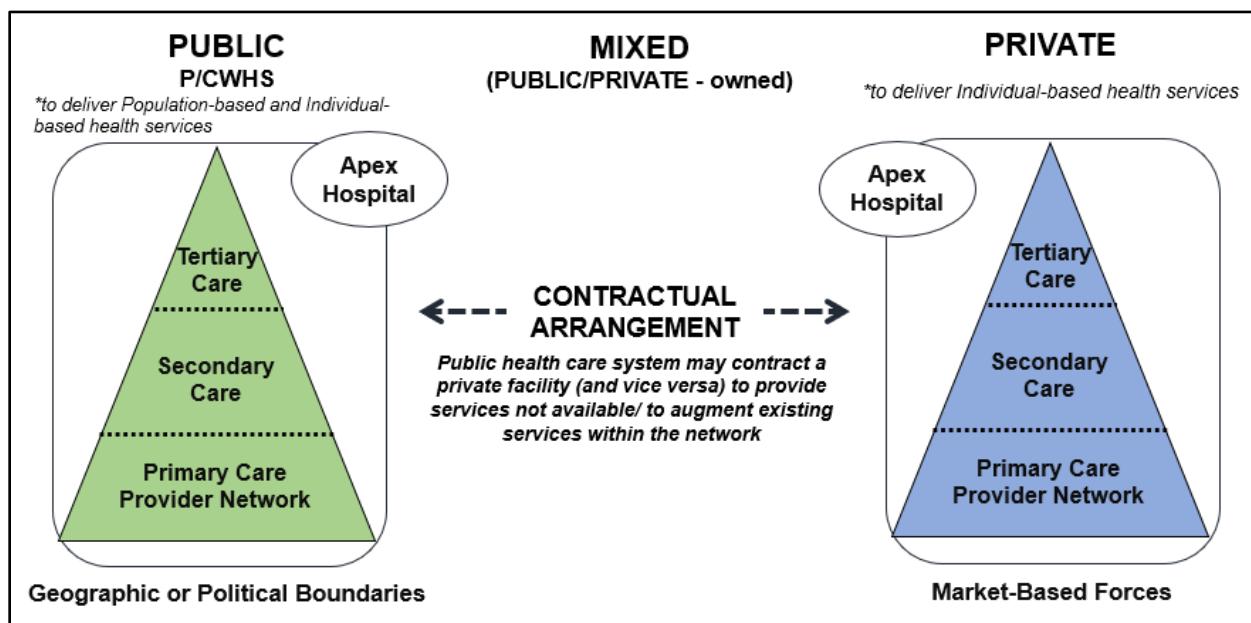

Figure 1 Structure of public, mixed, and private HCPNs

The HCPN shall be composed of PCPN providing primary care services, and hospitals delivering secondary and tertiary care. The PCPN shall be composed of the following health facilities that provide population and/or individual-based primary care services:

1. Primary Care Facilities, such as Rural Health Units, Health Centers, and Medical Outpatient Clinics, which shall ensure proper coordination and service delivery across the PCPN; and,
2. Other health facilities necessary for the delivery of primary care, such as but not limited to, health stations, stand-alone birthing homes, stand-alone laboratories, pharmaceutical outlets, and dental clinics.

The following health facilities, whether public or private, shall provide general in-patient care services for the HCPN:

1. Infirmary, if present in the existing geographic or political boundary; and,
2. Hospitals, as classified by the DOH

HCPNs shall ensure the availability of ambulances and patient transport vehicles as necessary for its catchment population. All HCPNs shall have linkage with Drug Abuse and Treatment Rehabilitation Centers, Blood Centers, among others.

The prescribed HCPN service delivery design also requires all hospitals to have a Public Health Unit (PHU) to facilitate the provision of population-based health services and patient navigation. PHUs shall (1) ensure that hospital policies are aligned with national public health programs; (2) assist the hospital management in ensuring surveillance & reporting of notifiable diseases through the disease surveillance officer/coordinator; and (3) ensure proper referral and navigation of patients within the hospital and from the hospital to primary care facilities and other necessary facilities in the network.

The PHU shall be established under the Office of the Medical Center Chief or Chief of Hospital with the following minimum dedicated or designated staff:

1. Health education and promotion officer
2. Care navigator/educator.
3. Administrative staff.

The specific structure of the CV HRS is discussed in the next section of this manual, but the above HCPN structures and referral system framework was all considered in the development of CVHRS's referral protocols.

Requisites of a Functional Health Referral System

Operating an HRS requires attention to the various aspects that influence the functionality of the entire system, which include structural and procedural aspects. In Central Visayas, the following requisites of a functional HRS were all considered in the process of establishing and strengthening the referral system, and in the development of this manual.

1. Committed implementers that abides by and upholds the policies and guidelines of the referral system.
2. Service capability profile that is updated annually and is aligned with the health care provider network framework.
3. Referral guidelines that are responsive and efficient in addressing the referral gaps.
4. Established communication system that links providers with different levels of care.
5. Regular monitoring and evaluation as a basis in enhancing referral mechanisms.

How to achieve these requirements in Central Visayas are discussed in the succeeding sections of this manual. But collaboration and commitment of various stakeholders, especially of local government units are key to successful implementation.

OPERATIONALIZING THE CENTRAL VISAYAS HEALTH REFERRAL SYSTEM

The Central Visayas Health Referral System is composed of health facilities in the four provinces (Bohol, Cebu, Negros Oriental, and Siquijor) and three highly urbanized cities (Cebu City, Lapu-Lapu City, and Mandaue City) in Region VII. While each of these LGUs have their own province/city/district-wide referral systems within their HCPNs, one standard HRS is implemented in the entire region. This system can however be supplemented by LGUs with local protocols that consider the nuances of their local health systems.

The CVHRS helps ensure stronger coordination and collaboration among LGUs and health facilities within Region VII. This is important because transfer of patients from one province/city to another is a common practice in CV, and without a functional region wide HRS, geo-political barriers could delay patient transfer and hamper the timely provision of quality care.

Health Referral System Objectives and Guiding Principles

CVHRS aims to improve the overall quality of care of patients referred from one facility to the next by reducing operational inefficiencies, increasing transparency, and enhancing the existing processes of health facilities within a Health Care Provider Network.

Specifically, the system seeks to:

1. Ensure effective referral processes from the community to the health care facility to save lives and ensure quality and continuity of care;
2. Foster a well-coordinated relationship among all health care organizations in the health system and streamline communication among health service providers; and
3. Integrate referral management into the existing clinical workflow to ensure religious compliance to the agreed upon referral protocols stipulated in this Manual.

The operationalization of CVHRS is guided by the following principles.

1. All clients, regardless of socio-economic status and cultural background, deserve quality healthcare, wherever they are in the health care provider network.
2. Collaboration among local governments, communities, health facilities, and service providers in ensuring continuity of care through proper care coordination is critical to the provision of quality care.
3. There is no single facility that can provide all types of services effectively and can cater to all clients, thus health facilities must form a network to complement each other and refer clients accordingly.
4. To be functional and well-implemented, referral mechanisms must be guided by clear and mutually agreed upon procedures that consider the perspectives of different health facilities and situations of different localities.
5. As the Philippines gears towards UHC, the HRS must operate within the context of HCPN, with PCPN performing primary care-based navigation as its foundation.

6. Quality of referrals can be guaranteed only if it is well coordinated, appropriately attended by a health professional, and if needed, properly transported. Hence, the necessity for the HRS to ensure availability of communication systems, patient transport vehicles, and clear referral protocols.
7. To ensure efficiency of the HRS, case conditions must be properly matched with the appropriate facility. Hence, client conditions must be categorized, service capability of health facilities must be assessed and profiled, referral system structure including the matching of health facilities and of clients with primary care facilities must be organized, and all these arrangements must be disseminated to all facilities and health service providers within the network.
8. Establishing good relationships among health facilities and common understanding of protocols are crucial to ensuring proper care coordination.
9. Continuous monitoring and evaluation help the referral system determine successes and shortfalls and identify challenges in referral that must be addressed to improve the quality of care.
10. The referral network must continuously innovate and use technology to further make referral mechanisms efficient and effective.

Health Referral System Structure

The referral structure of CVHRS system follows the HCPN service delivery design, which emphasizes primary-care-based care coordination through the primary care provider network. Clients are matched with primary care facilities, which help determine where clients should be managed and referred to. This design encourages clients to begin accessing health services at the primary level rather than going to hospitals directly, except during emergency situations.

The table below shows the number of health facilities – from primary care to level III hospital in each major island in the region.

PROVINCES	HEALTH FACILITIES											
	BHS	HC	Infirmaries		Level I		Level II		Level III		Lying-in/ Birthg Clinics	
			Public	Private	Public	Private	Public	Private	Public	Private	Public	Private
Cebu	981	74	21	7	10	7	0	10	1	8	44	99
Bohol	622	53	9	1	5	6	0	4	1	0	40	15
Negros Oriental	473	29	12	0	3	1	0	3	0	1	23	7
Siquijor	63	6	1	0	1	0	0	0	0	0	6	1

The UHC Law stresses that strengthening PCF helps guarantee that all clients will be able to access quality health services while minimizing costs for the patients and their families. Constituents residing in the different barangays of a municipality can visit the barangay health stations or health centers to seek for initial health consultation. Patients with symptoms of ailment that cannot be managed in the BHS or health center will be referred by the C/MHO to the appropriate hospital in HCPN. The specific referral hospital will be determined based on the type of service the client needs and the service level agreement of the referral network. Cases that require highly sophisticated treatments

shall be referred to the HCPN's apex referral hospital. The figure below summarizes this referral structure.

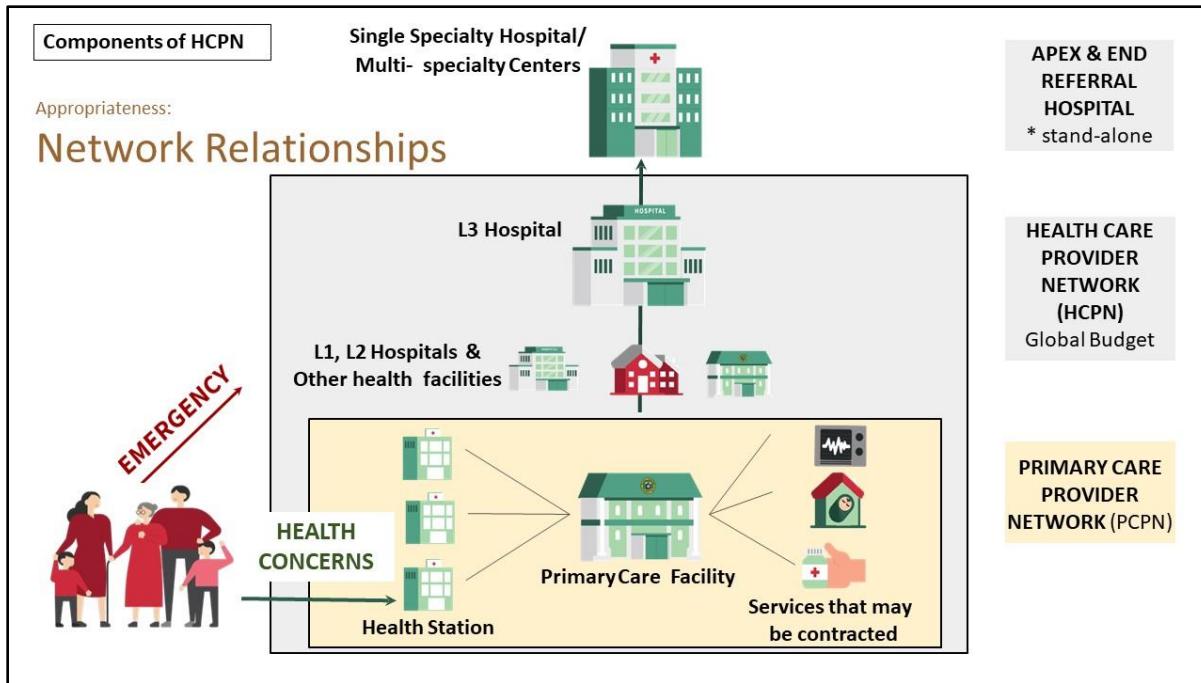

Figure 2 HCPN Service Delivery Design

Health Facility Matching and Categorization of Referrals

To refer the right client to the appropriate health facility, the referring service provider must always ask two questions: 1) what the condition is and the type of service it needs (generalist, specialist, or sub-specialist) and 2) which facility in the network has the capacity to manage it. As such, HCPNs in CVHRS shall map the capacity of all health facilities within the network and categorize client conditions to help service providers answer the two questions.

Service Capability Profiling

Health facilities within CVCHD shall regularly conduct service capability profiling and summarize it using **Annex A**. This summary shall be consolidated by the referral committee of the HCPN and shared with all health facilities in the network and the CHD. This consolidated service capability profile shall be used as reference by the members of the HCPN whenever they identify the referral facility for every case.

In addition, the CVCHD also developed a directory of (**Annex B**) healthcare organizations per LGU. This directory shall be updated as deemed necessary by CVHRS.

Categorization of Referrals

To facilitate identification of appropriate referral facilities for every case, health facilities in CVHRS shall use the categorization of referrals below. These categories are based on two things: (1) type of service the case needs and (2) urgency of the condition. These general categories of cases shall also be adopted in the e-referral system.

- **Type A referral** corresponds to conditions that require subspecialist care and management.
 - **Group A1** subcategory – emergency (life-threatening) conditions that require subspecialist evaluation and management.
 - **Group A2** subcategory – non-urgent (non-life threatening but needs immediate care) conditions that require subspecialist evaluation and management.
- **Type B referral** pertains to conditions that require general specialist care and management.
 - **Group B1** subcategory – emergency conditions that require specialist evaluation and management.
 - **Group B2** subcategory – non-urgent conditions that require specialist evaluation and management.
- **Type C referral** pertains to conditions that require trained generalist care and management.
 - **Group C1** subcategory – emergency conditions that require trained generalist evaluation and management.
 - **Group C2** subcategory - non-urgent conditions that require trained generalist evaluation and management.

By categorizing cases, determining where to refer a case would be easier for HSPs. Moreover, categorizing conditions based on urgency (1 and 2 subcategories), HSPs would be properly advised on the necessary preparations for referral (e.g., transportation, accompanying service provider, prior call, etc.).

To facilitate the process of categorizing referrals, CV HRS shall develop a service level agreement providing the list of commonly referred cases in the region and tagging these conditions with the appropriate category. So that decision-making would be even faster for HSPs.

Matching of primary care facilities with referral hospitals

Once the HSP has identified the category of the case being referred, s/he should be able to match the case with the appropriate facility based on the available service capability profiles of health facilities. To facilitate this, CV HRS summarized the matching of primary care facilities with referral facilities by category (A, B, and C).

CATEGORIZATION of CASES and CONDITIONS for REFERRALS		
CATEGORY A (Subspecialist)	CATEGORY B (Specialist)	CATEGORY C (Generalist)
Sub-Category A1 Sub-Category A2	Sub-Category B1 Sub-Category B2	Sub-Category C1 Sub-Category C2
Match patients/ clients conditions with appropriate health facilities and service providers.

Electronic Referral System

CVHRS developed an electronic referral system to address most of the challenges that confront HRS and usually hinder the provider networks in ensuring quality referrals. These challenges include poor coordination due to weak communication systems, non-completion/non-tracking of referral continuum especially when paper-based tools are used, and weak monitoring and evaluation component of HRS.

This e-referral system shall be the primary referral tool of CVHRS, which means that it will serve as a communication system, referral record, and monitoring and evaluation tool at the same time. However, this system shall still be supported by another communication system (cell phone, trunk line) for proper coordination of care, especially when the client needs emergency or complex care.

Moreover, paper-based tools shall back up the electric system to ensure when problems with the electronic system are encountered, quality of referral will not be compromised. For example, in cases when internet connection is down, paper-based referral tools shall be used.

Framework of e-referral system

Management of e-referral system

Electronic referral management system aims to improve the quality of care that is provided while increasing transparency and enhancing the existing processes for health care facilities. It is a powerful tool that enables the health providers to keep track of all their patient referrals throughout the care pathway. It helps in achieving the goal of improving and streamlining communication among health care providers involved in patient's care. This system eliminates the operational inefficiencies between providers, ensuring timely treatment for patients.

In Central Visayas Center for Health Development VII, the Information and Communication Technology Unit is responsible in maintaining the functionality and operationalization of the Electronic Referral System. To fully utilize the system, ICT requires a functional computer and internet (at least 3 mbps/device). The system can also be accessed using tablet, smartphones and cellular phones.

To effectively manage the system, the Information and Communication Technology Unit shall be responsible for the following tasks.

- a) Manage system maintenance, which includes modifications for system enhancements, fixing system bugs, creating/updating admin accounts, and others.
- b) Assess the readiness of the ICT infrastructure for facility/ies that will implement e-Referral.
- c) Oversee the system, ensuring that the server that hosts the electronic referral system is up and running, and that all of the system features are functional.

- d) Ensure that the server's Internet connection is not interrupted and that the 711-healthline, which responds to all system problems 24/7, is operational.
- e) Provide the technical/troubleshooting assistance that is beyond the capacity of the health facilities' system admin/ IT.
- f) Ensure the full utilization of the system by providing functional ICT equipment and the availability of IT personnel/admin from the facility that can manage the system.

Maintenance and Troubleshooting

The continuous functionality and efficiency of the e-referral system requires proper maintenance and immediate management of glitches and other issues in the system. Its utilization should not be interrupted too long to avoid discouraging implementers from religiously using it, especially in the earlier stages of implementation.

Health facilities must also be capacitated in maintaining it and in troubleshooting common issues in the system. The table below provides the recommended actions when health facilities encounter the indicated issues.

Concerns	Recommended Action
How to request for user credentials in the Facility	<p>For IT/ admin account: Request the log-in credentials from any one of the 711 DOH CV CHD Health Line IT Tech Support Team.</p> <p>For end-user accounts (i.e., Doctor, Nurse, Midwife, Medical Dispatcher etc.): Request the login credentials from the IT department or the respective CVHRS Point Person.</p>
Holding multiple accounts	<p>Each user is given a credential. Account sharing is not permitted.</p> <p>One user = One User Credential</p>
Forgot password	<p>For IT/ Admin Account: To update account, send an email or call the 711 DOH CV CHD Health Line Tech Support Team. After setting up or updating the account, the Tech Support representative will contact the facility to provide an update on the reported issues.</p> <p>For end-user account (i.e., Doctor, Nurses, Midwives, etc.): Send the request to the IT Department or Admin to update the password or account information.</p>
How can a user account be deleted if no longer connected to the facility	<p>The user account cannot be deleted, however the CVHRS e-Referral Admin can manage the status of each user's account by signing in to their Admin Account. Just simply click the "Manage Users" menu (users' directory will have displayed); input the user name on search box and click search button, once the name is displayed select username you wish to deactivate. Then go to "status field" and change to "Inactive" then click "Update Button", for changes to take effect. The user will no longer be able to log in to his/ her account after being deactivated.</p>
What is the best way for us to report issues	For any encountered issues or training requests, please email the DOH-ICTU at dohcvchd711it@gmail.com with

Concerns	Recommended Action
or request user training	the subject " Reporting Issue " or " Letter of Intent " (for training request). Once received the email, 711 DOH CV CHD Health Line representative will coordinate the requesting facility the soonest possible time.
Is there any app version for CVHRS/ e-Referral System?	App is currently undergoing development. For now, it can be accessed via Google Chrome browser on the desktop, laptop, tablet and smartphone.
Can the patient be referred to two or more facilities at same time?	Patient cannot be referred to more than one facility unless the referral is being redirected. After being redirected, check the dashboard, and click "Referral" menu then click referred patients then choose the patient that was being redirected. Click "Redirected to other facility" then select facility and select department" then click redirected. Then click view more under the patient history then repeat the process and refer to another facility.
Doctor's credentials connected to multiple facilities	The doctor will require a user account for each facility to avoid system overwrite. When creating the user account, write the "last name" and the name of the facility (e.g., Dela Cruz-GMPH).
Cannot Access the system	Check if there are problems in logging in to the system or if other facility has the same concerns. If not, check if the concerned facility has internet connection. Advise to restart their pc or their router. For "no internet connection" advise to call their facility IT or their internet provider to escalate their concerns about their internet. If internet connection is not the problem, still advice to restart their pc. If problem still exist, escalate the concern to the System Development Team to check if there are bugs or error in the system. Once the Development Team fixed the problem, inform the facility to try to log in again to for resolution.
Chosen facility department does not reflect after submission of referrals.	For System Bugs, escalate the concern to our Development Team. Once fixed, inform the concerned facility that the problem is now fixed so the facility can try to simulate on their end for confirmation.

Referral Committee

CVHRS is orchestrated by a technical working group at CVCHD level. Meanwhile, at the HCPN level, a city/provincial referral committee shall be organized. This committee shall be composed by representatives from the following organizations with the Provincial/City Health Officer or his/her designated representative as chair. The committee shall decide on who among their members shall serve as secretariat.

- Apex hospital – Medical Center Chief

- Provincial/City hospital – Chief of Hospital
- Representative of district hospitals – Chief of Hospital
- Representative of private hospitals – Medical Director
- Representative of C/MHOs (AMHOP President)
- Provincial DOH Office (PDOHO) – DMO V

The HCPN may also consider inclusion of patient representative, private primary care facility representative, diagnostic center representative, CSO representative, etc. in the referral committee depending on the composition and needs of the HCPN.

The City/Provincial Referral Committee shall be responsible for the following:

- Lead the dissemination of referral protocols, including the contents of this manual, to all health facilities in the HCPN.
- Generate, summarize, and analyze referral data to determine the gains and shortfalls of the referral system.
- Conduct quarterly/semi-annual/emergency/ad hoc meetings to discuss the implementation of HRS and carry out the following, as necessary.
 - Organize a forum for the entire network to discuss the identified challenges, as necessary.
 - Propose solutions to identified challenges
 - Submit reports on the identified issue/challenge to CV CHD.
- Spearhead referral system monitoring and evaluation
- Serve as mediation body for disputes/conflicts involving referral among health facilities/service providers within the HCPN; and develop a grievance mechanism – including guidelines on what issues should be elevated to the referral committee level – for the HCPN.
- Coach and mentor health facilities on referral system implementation.

REFERRAL GUIDELINES

This section provides the referral protocols and procedures of CVHRS, which shall be followed by all HCPNs in the region and their respective member facilities.

Health facilities in CV, whether public or private, that do not belong to any HCPN yet shall likewise abide by these protocols and procedures whenever they refer clients in HCPNs within the region. Moreover, like the other facilities in the network, they shall be supported by CV CHD in utilizing the referral tools of CVHRS.

The Central Visayas Center for Health Development released Policy Guidelines in the Conduct of Central Visayas Electronic Health Referral System (CVeHRS) for purposes of implementing proper coordination among healthcare facilities to ensure and streamline the conduct of timely, efficient, and quality health referrals; delineate roles and duties of the medical personnel, hospitals, EMS Providers, and health facilities involved in the implementation of the CVeHRS; establish strong linkages and commitments among stakeholders and implementing units to the CVeHRS; and to have a harmonious and facilitated referral of patients.

Specific guidelines in the conduct of health referral

1. The Central Visayas Electronic Health Referral System (CVeHRS) shall be the only electronic system to be utilized by all health facilities and EMS Providers in Central Visayas for referral.
2. The CVeHRS shall take into consideration the general welfare of the patient and the capabilities of facilities within the system.
3. The CVeHRS online system shall be active 24/7, specifically in hospitals that provide medical management.
4. Coordination and teamwork shall always be observed in the conduct of referral .
5. All health facilities and emergency medical services units shall assign a point person who shall perform functions relating to EHRS ensure attendance to all the meetings called by the DOH CVeHRS Technical Working Group or the apex hospital.
6. Patients that need and/or require specialized medical services shall be referred to the next appropriate facility within the Health Care Provider Network using the CVeHRS.
7. Patient's data shall be inputted completely and accurately to the system prior to or during patient transport to the referral facility.
8. Paper-based tools shall back up the electronic system to ensure that when problems with the electronic system are encountered, quality of referral will not be compromised. For example, in cases when Internet connection is down, paper-based referral tools shall be used.
9. Phone calls shall be to coordinate, facilitate, and ensure successful referral. The referring physician shall ensure that the referral has been accepted or redirected by referral facility prior to transporting the patient.

10. Thorough assessment by the physician on duty and initial life-saving interventions shall be done before referring the patient to the facility. The physician on-duty shall ensure that the patient's vital signs shall have been stabilized medically prior to transport or while in transit to the referral hospital.
11. A referred patient shall be attended to immediately upon arrival, giving preference to urgent and/or emergent cases.
12. A turnaround time of 15 minutes or less, but not later than 30 minutes upon arrival shall be strictly followed for an emergency case.
13. Medical Directors, Chiefs of Hospitals, or Heads of the Facilities shall be given a designated account to access and monitor the CVeHRS and alert the physician-on-duty at the ER to receive, direct or in certain justifiable circumstances and further refer or re-direct the referred patients.
14. While on transit, continuous medical care must be afforded by the accompanying nurse or midwife which shall be in communication with the referral facility for medical direction.
15. Transporting nurse or midwife must obtain proper training on basic life support and in managing emergency patients to attain well-coordinated interventions in saving the life of the patient.
16. Referral facility shall notify the referring facility once patient has arrived.
17. Continuous training and updating of capabilities of the health service providers shall be done to include orientation in the use of CVeHRS.
18. The CVeHRS shall strictly adhere to the provisions of the Republic Act 10173 or the Data Privacy Act of 2012.
19. The 711 Healthline shall monitor and call the health facility once turn-around time is not met. The former shall also inform the Regulatory, Licensing and Enforcement Division (RLED) of non-compliance of health facilities in the usage of CVeHRS.

The flow of the e-referral is dependent on the capability of the health facility. In some instances, it may not follow specific orders as shown in the diagram in page 31 depending on the condition of the patient. However, only external referral is considered in this guideline with the following sub-types:

- a) **Horizontal referral** – happens between facilities with the same functional capacity (e.g., referral between two level 1 hospitals. It is done in consideration of catchment area, availability of services (e.g., the hospital's ICU is full, so the patient is transferred to another hospital with available ICU bed), economic factors (e.g., from a private to a public hospital with the same functional capacity), and others.
- b) **Vertical referral** – is executed between health facilities with different functional capacity (e.g., a health center and a level 1 hospital). It can either be an **upward referral**, which is done from a lower- to a higher-level facility when a patient needs more advanced care, or the opposite – **downward referral which** referral is done

when a patient has to be referred back to the originating primary care facility, or when a service can be more efficiently provided in a lower-level facility.

To delineate the responsibilities well in the conduct of referral of patients more effectively, the respective roles and responsibilities are also specified as follows:

A. Department of Health Central Visayas Center for Health Development

1. Strategizes the effective implementation of the Electronic Health Referral System;
2. Supports the program through provision of equipment and human resource;
3. Implements and maintains the Electronic Health Referral System in Central Visayas following the approved policy guidelines;
4. Facilitates the conduct of meetings with the Hospital Center Chiefs, Chiefs of Hospitals, Medical Directors, City Health Officers / Rural Health Officers, EMS Providers and other stakeholders; and
5. Monitors and keeps records of the Minutes of the Meetings, activity reports, accomplishment reports, complaints and other related documents.
6. Monitors and evaluates the compliance of all the health facilities and EMS Providers to the CVeHRS and enforces its strict implementation.

B. Referring Hospital Facility

1. Attends to the incoming patient's medical needs while at the Emergency Room;
2. Assesses the physical condition of the patient. If the hospital facility is incapable to handle the patient's ailment by reason of manpower, facilities and capabilities in the performance of the needed procedures/interventions, the patient shall be referred to the next appropriate hospital facility through the electronic referral system;
3. Fills-in the details of the patients found in the web-based application prior to transfer or while in transit to the referral facility;
4. Provides the ambulance or necessary vehicle in transporting the patient from the referring facility to the referral facility with a qualified accompanying nurse or midwife trained with Basic Life Support; and
5. Ensures that all processes and details are taken cared of to guarantee smooth admission of patient in the referral hospital.

C. Referral Hospital Facility

1. Accepts electronically the referring hospital's request for referral of patient;
2. Facilitates in receiving the referred patient at the Emergency Room within the given turnaround time of 15 minutes or less;
3. Receives the patient and immediately provides appropriate interventions, including the admission of patient;
4. Informs the referring facility as to the current status of the patient through the electronic health referral system; and

5. In the event the referral hospital is incapable of admitting the patient by reason of full bed capacity, the Referral Hospital shall call the 711 Healthline to redirect and facilitate admission of the patient to the appropriate health facility.

Pertaining to the Monitoring and Compliance, these are also included in the Policy Guidelines issued to the health facilities such as:

1. The 711 Healthline Unit under the Health Emergency Management Services (HEMS) Section and Information and Communication Technology Unit under the Health Information Section shall monitor the compliance and performance of all health facilities and EMS Providers in the conduct of Electronic Health Referral System.
2. Vicente Sotto Memorial Medical Center shall be designated as the monitoring Apex Hospital.
3. The Monitoring and Compliance Team composed of the aforementioned units and hospital shall submit report monthly to the Office of the Health Facility Development Section (HFDS) and to the Regulatory, Licensing and Enforcement Division (RLED)
4. The HFDS and RLED shall inform, recommend and endorse to the Regional Director these noncomplying health facilities for proper and appropriate action.

The referral decision of an individual clinician is the heart of the referral system. Such decisions are based on his/her professional attributes, knowledge of the health care system, and clinical judgement. However, advancements in diagnostic technologies and therapeutic modalities demand that the physician keep up with current, evidence-based and relevant health care practices.

This is the importance of proper case management/Clinical Practice Guidelines (CPGs) by health care providers. The use of protocols is an approach to encourage standardized, safe, and best practices in the area of health referrals.

The case management protocol may contain the following:

1. Justification for admission
2. Diagnostic Criteria
3. Treatment and management of care
4. Complication and Management
5. When to refer as applicable
6. Final disposition

Referral Procedure

The referral flow below follows three stages: pre-referral stage, referral stage, and post referral stage. All guidelines and principles discussed in the earlier parts of this manual shall be observed when undergoing the referral procedure.

Pre-referral Stage

1. Assessment of the Patient:
 - a) Thorough History & Physical Exam
 - b) Relevant Diagnostics
 - c) Medications
 - d) Procedures and Interventions
 - e) Diagnosis/Impression
2. Determine the need for Referral: Reason for ReCo (based on HRS guidelines)
 - a) Expert assessment/advise/management
 - b) Technical intervention, examination, procedure and diagnostics
 - c) Service beyond the capability of the facility
3. Categorize the case
4. Identify referral facility

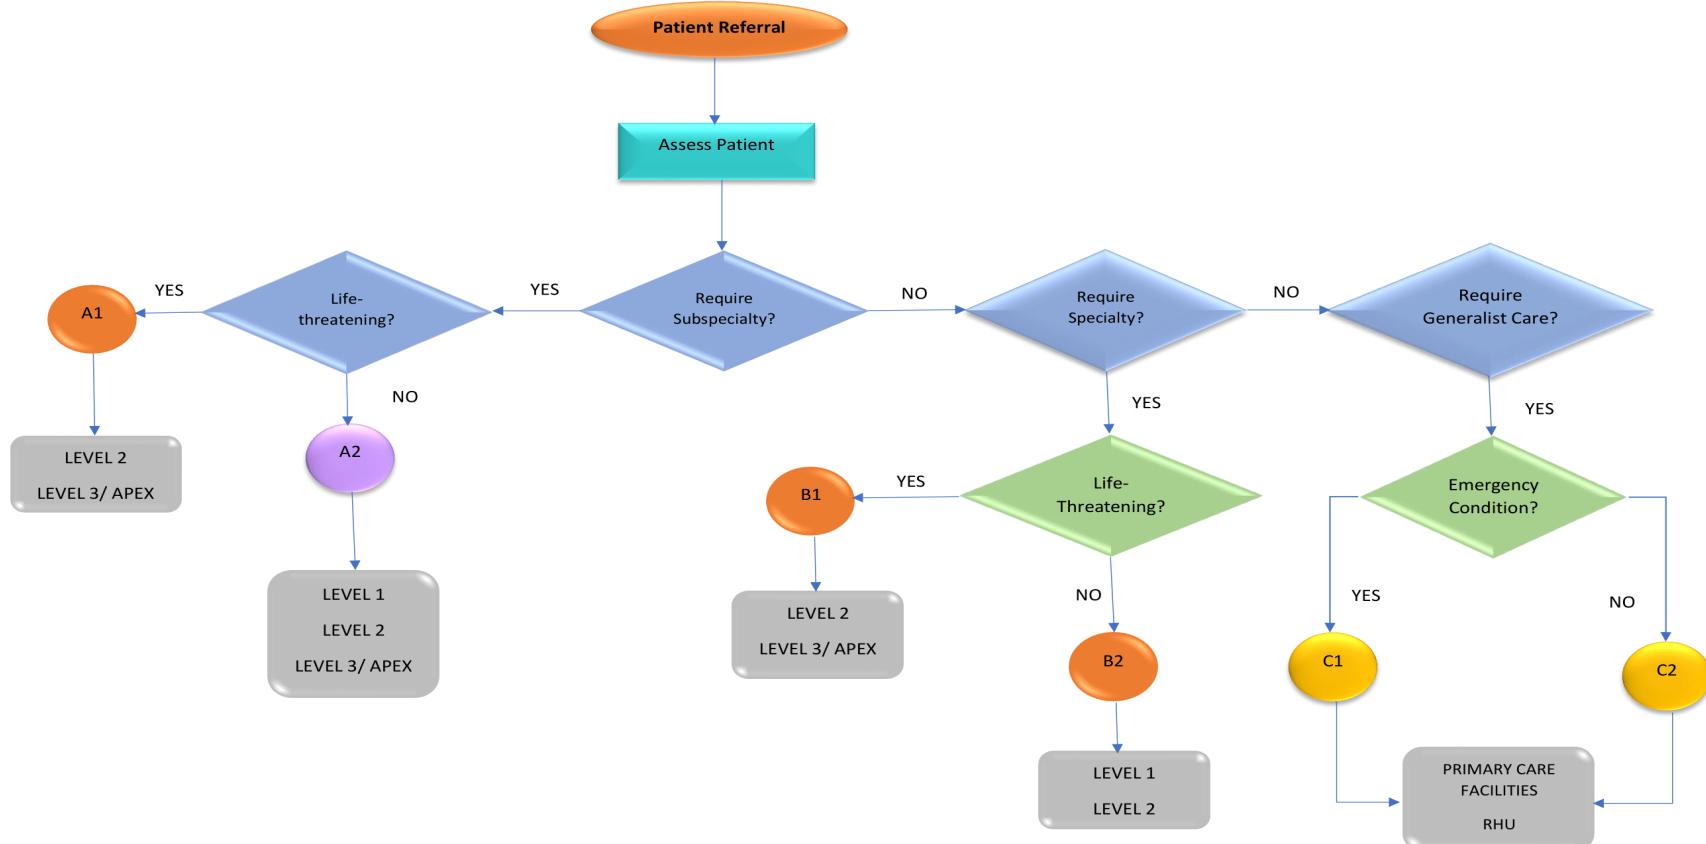

Referral Stage

1. Access the e-Referral System
2. Accomplish electronic/paper-based referral form
3. Wait for the response and recommendation of the receiving health facility
4. If receiving health facility requests for a call or if there is a need for urgent referrals, make a call. **When making a call,**
 - a) Identify yourself - name, designation & facility
 - b) Politely ask for the name and designation of the other party
 - c) State purpose of call
 - d) Utilize e-ReCo when requesting for further information and clarification-
5. Provide the pre-transport management as needed
6. Send patient for referral once accepted
7. Discuss and advise the action and disposition of the referral with the patient and significant others.
8. Referral/Consultation (ReCo) Guide
 - a) Transport and Destination Requirement (for referred patients)
 - b) Mode of transport must use licensed ambulance or Patient Transport Vehicle
 - c) Medications and provisions
 - d) Accompanying medical staff
 - e) Other needs and special instruction

Post-referral

1. Documentation
1. Accomplish standard CVHRS referral form
2. Return slips procedures or tracking tool
3. Record in the logbook accordingly
4. Pertinent data and lab results
5. Instruction to patient/relatives

High Level Flow Chart of Categorization of Cases and Conditions for Referrals

General Policies on Medico-Legal Cases

Each city/province in CV has a set of guidelines on managing medico-legal cases. These guidelines take into account the situational differences per LGU. However, the following rules shall be observed across CV when managing medico-legal cases.

1. As a general rule, all City/Municipal Health Officers (C/MHO) shall act as medico-legal officers in their municipality in the absence of the provincial medico-legal officer
2. All requests for medico-legal examinations must be accompanied by an official request from the police authorities of the concerned municipality or barangay
3. Medico-legal requests not within the capability of the C/MHO concerned should be referred immediately to the NBI together with corresponding reasons for referral
4. In cases where the C/MHO of the area concerned is out-of-town and after all efforts to locate him / her had been exhausted, the C/MHO of the nearest municipality within the HCPN must perform the requested examination
5. All medico-legal cases shall be the responsibility of the C/MHOs, unless the patient would require the services of the hospital for further evaluation and treatment. During weekends and holidays, the hospital can attend to medico legal patients
6. Transport vehicle to fetch the C/MHO must be provided by the requesting parties concerned. If autopsy is conducted in a private setting, the MHO should be escorted by a police officer
7. Medico-legal fees shall be paid to the C/MHO based on the rates provided by the Magna Carta for Public Health Workers. This policy is, however, subject to the availability of funds and the usual accounting and auditing rules and regulations
8. In some instances, where there are no C/MHOs available in the area or HCPN concerned, the Provincial Health Officer may, upon prior notice, direct any government physician, preferably with expertise on the case, to perform the required examination. This is, however, subject to the presentation of a certification from the Office of the Local Chief Executive concerned that the C/MHO is not available
9. All other policies not included herein in relation to the above-mentioned subject matter shall be referred to the Provincial Health Officer for evaluation and approval and subsequent inclusion in this general policy guideline on referral of medico-legal cases.

MONITORING AND EVALUATION

Monitoring and Evaluation system is one of the key components of CVHRS. It provides feedback on the implementation of HRS that HCPNs and individual facilities can use to improve their referral practices. With the e-referral system, HRS M&E is relatively easier in Central Visayas as referral data can be readily accessed in the system. The e-referral system also decreases, if not eliminate, the need for health facilities to count, encode, and consolidate raw data from paper-based records.

The HRS M&E aims to determine if (1) the guidelines composed of steps from referral decision making to the transfer and acceptance of the patient are being followed; (2) the categorization of conditions to allow appropriate referrals in designated facility-level is used; (3) Coordination of referral prior to transfer of patient is practiced; and (4) standardized referral tools are properly and effectively used. Moreover, M&E helps determine the issues and concerns that arise in the implementation of the referral system and in operationalizing the HCPN.

As discussed in previous sections, the referral committees of HCPNs/LGUs shall spearhead local M&E activities in CVHRS. However, at the regional level, CV CHD, in collaboration with Vicente Sotto Medical Center shall lead regional M&E initiatives.

HRS Implementation Indicators

The following indicators shall be tracked by CVHRS and the HCPNs/LGUs within the network quarterly.

1. Total number of referrals sent in the HCPN/CVHRS (x = total count of all outgoing referrals in the HCPN/CVHRS)
2. Number and percent of referrals sent by facilities within the HCPN/CVHRS (y = count of all outgoing referrals per facility, percentage = y/x times 100)
3. Total number of referrals received in the HCPN/CVHRS (m = count of all incoming referrals)
4. Disaggregation of incoming and outgoing referrals by category.
5. Number and percent of referrals received by the facility (n = Count of all incoming referrals received by facility, percentage = n/m times 100)
6. Number and percent of unqualified referrals (p = count of all inappropriate referrals (cases that do not need to be referred or referred to the wrong facility, e.g., low-risk pregnancy referred to an apex hospital despite the availability and accessibility of a lower-level facility that can manage it), percentage = p/x times 100)
7. Number and percent of unsuccessful referrals (q = count referrals that were not received, percentage = q/x times 100)
8. Uncategorized referrals – conditions not listed in the categorization of referrals
9. Referrals coming from other HCPN
10. Number of referrals transferred to other facilities (referrals accepted by receiving facilities but eventually referred to another facility)

11. Number of Adolescent referrals (referrals within the age range of 10 to 19 years old)
12. Number of referrals for FP services (BTL MLLA; PPFP/PPIUD/ Interval IUD, others)
13. Number of sub-category 1 referrals (emergency or life-threatening unaccompanied by a health service provider)
14. Number of uncoordinated referrals
15. Reasons for referrals
16. Reasons for transfer of referrals

M&E Guidelines

1. The referral committee of each province/city/HCPN shall be given access to the referral data of their respective areas of assignment.
2. The RC shall generate quarterly referral data from the e-referral system and convene quarterly to analyze them and develop action points based on M&E findings.
3. While quantitative referral data shall be generated through the e-referral system, qualitative data shall be collected during meetings, workshops, and from the incident reports/feedback of health facilities.
4. Health facilities shall document issues and concerns, including disputes in referral using a standard incident report and feedback form (Annex D) and submit it to the RC. These reports shall be discussed during the regular quarterly meeting of the RC where appropriate response shall be determined. However, cases that require immediate attention shall be discussed by the RC within a month upon receipt of the report.
5. No incident/issue shall be addressed by the RC without an official report.
6. The RC shall organize a city/province/HCPN-wide pause and reflect session twice a year to collectively generate lessons from quantitative and qualitative referral data and create plans on how to further improve HRS implementation.
7. The RC shall coach and mentor health facilities on referral system implementation as needed (based on request and on need as determined through M&E).
8. The HRS TWG of CV CHD shall organize semi-annual pause and reflect sessions for the entire CVHRS.
9. Whenever needed, the HRS TWG of the CVCHD shall coach HCPNs on HRS implementation and set meetings with their RCs to analyze referral data, discuss issues and concerns, and develop HRS plans.
10. While RCs of the different provinces/HUCs/HCPNs have yet to be formed, the Health Facilities Development Unit (HFDU) of the CVCHD, as chair of the HRS TWG, and working with the VSMMC as apex hospital, shall monitor facility and HCPN-level compliance with the manual's provisions. It shall also initiate/facilitate the resolution of cases of non-compliance at both the facility and HCPN levels.

ANNEXES

ANNEX A: Health Facility Profiling System

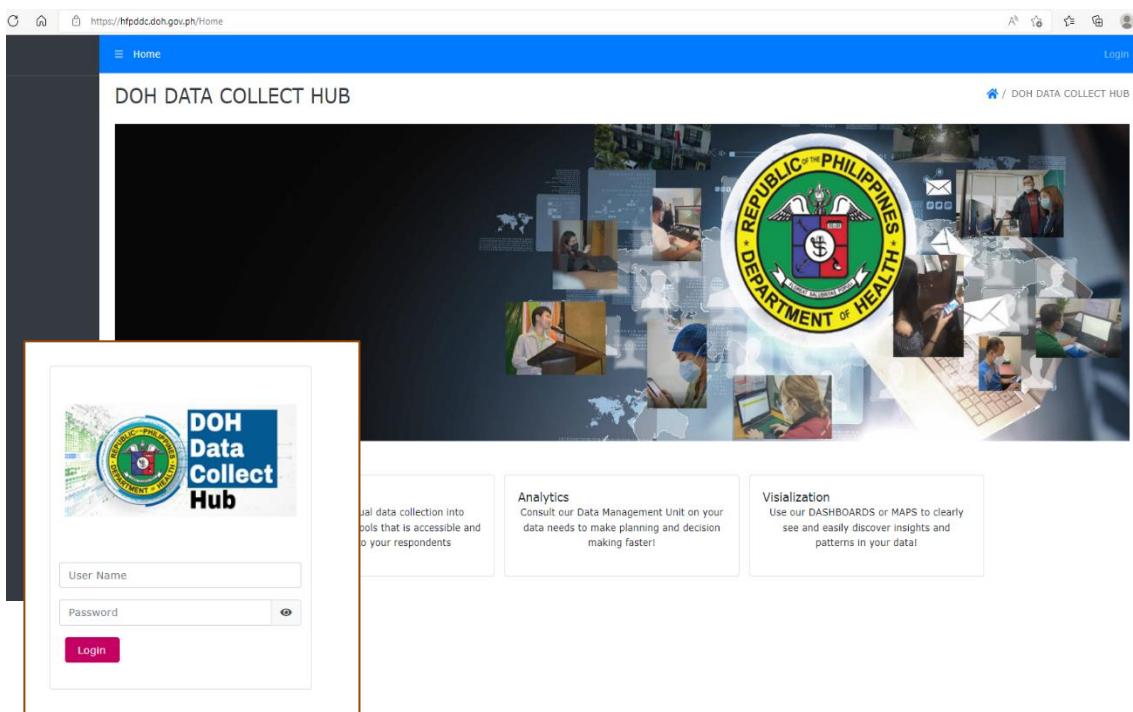

The Health Facility Profiling System is the annual data collection of information about inputs and selected quality indicators from all hospitals and Primary Care Facilities using an electronic platform which includes their basic profiles like services, human resources, equipment, infrastructure, and others.

The Health Facility Profiling System is a collaborative project of the Health Facility Development Bureau (HFDB) and the Knowledge Management and Information Technology Service (KMITS) from the Health Facilities Infrastructure Development Team (HFIDT) cluster of the Department of Health.

Policies and Mandates:

- Department Memorandum 2021-0419 and 2021-0443, “Implementation of the Health Facility Profiling System in all Hospitals and Infirmarys”
- Administrative Order 2021-0032, “Implementation of the Philippine Health Facility Development Plan (PHFDP)”
- Department Circular 2021-0206, “Cascading Materials Related to the Manuals of Standards of Hospital Nursing, Pharmacy, and Nutrition and Dietetics Services Developed by the Health Facility Development Bureau”
- Department Memorandum 2021-0271, “Submission of Accomplished Hospital Nursing, Pharmacy, Finance, and Health Care Waste Management Services Manuals of Standards Self-Assessment Tools”

TSEKAP SERVICES

Obligated primary preventive services, diagnostic examinations, and covered drug and medicines under PCB1

Obligated Primary Preventive Service:

- Consultation
- BP Measurement
- Breast examination
- Visual inspection with acetic acid
- Body measurement

Diagnostic Examination:

- Complete blood count
- Urinalysis
- Fecalysis
- Sputum microscopy

- Fasting blood sugar (Glucometer may be used in low resource settings)
- Lipid profile (Cholesterol pen may be used in low resource settings)
- Chest x-ray

Conditions	Medicines
Asthma	<ul style="list-style-type: none"> • Inhaled short acting beta 2 agonist • Inhaled corticosteroid • Oral corticosteroid
Acute gastroenteritis with no or mild dehydration	<ul style="list-style-type: none"> • Oral rehydration salts
Upper respiratory tract infection or pneumonia low risk	<ul style="list-style-type: none"> • Amoxicillin (adult and pedia preparation) • Erythromycin (adult and pedia preparation)
Urinary tract infection	<ul style="list-style-type: none"> • Flouroquinolones

MCP SERVICES (BEmONC Health Care Facilities)

- Basic maternal care to include prenatal and postnatal care
- Basic emergency obstetric and newborn care services as defined to include newborn resuscitation
- Newborn screening
- Family planning services
- Breast and cervical cancer screening
- Risk assessment and clinical screening and diagnosis of STI and HIV
- Laboratory screening
- Syndromic case management of STIs
- Counseling
- Monitoring, evaluation, research and dissemination
- Referral
- Recording and reporting
- Maternal death reporting using the recommended facility reporting form
- Civil registration of births and deaths

CEmONC Health Care Facilities

The CEmONC Teams should be competent in the delivery of the following services:

- BEmONC services as defined
- Surgical childbirth (cesarian section)
- Safe blood transfusion
- Management of newborn complications
- Surgical family planning methods in addition to basic FP methods
- Breast and cervical screening including interpretation of laboratory results
- Management of breast and cervical cancers
- STI risk assessment and screening
- Management of STIs and its complications 30
- Counseling
- Referral
- Recording and reporting
- Maternal death reporting using the recommended facility reporting form

- Civil registration of births and deaths competent in

TB DOTS SERVICES

Diagnosis:

- Direct Sputum Smear Microscopy (DSSM) – 2 Sputum Specimen
- Gene Xpert Screening (PMDT Services)
- Tuberculin Skin Testing (PPD)

Treatment:

- Provision of free medications for entire course of treatment
 - Category I – 2 months HRZE/4 months HR
 - Category II – 2 months HRZES & 1month HRZE/ 5 months HRE
 - TB in Children Medications
 - Isoniazid Preventive Therapy
- Assignment of treatment partner for patients
- Counseling: Pre, Intra, Post Treatment
- Monitoring of treatment through DSSM follow-ups, weight taking and clinical improvement
- Referral to the other facilities if needed
- Provider initiated counseling and testing (PICT) for patients under CAT A & B sites
- Referral of presumptive drug resistance patient to PMDT Facility
- Contact tracing

ANIMAL BITE PACKAGE

- Consultation and Treatment

CERTIFIED – Certification given by National Coordinating Committee – Public Private Mix DOTS (NCC-PPMD) and Philippine Coalition Against Tuberculosis (PhilCAT) that shall certify the capability of a facility as a provider of TB DOTS Services. Certification is a major requirement for accreditation.

ACCREDITED – Given by Philhealth ensuring that the training and technical capabilities of the center are appropriate. Philhealth members can avail the diagnostic exams, consultation, drugs, and health education during treatment.

Blood Service Facility (BSF) - A unit, agency or Institution providing blood products.

SERVICE CAPABILITY:

Blood Station (BS)

1. Advocacy and promotion of voluntary blood donation and healthy lifestyle.
2. Provision of whole blood and packed red cells.
3. Storage, issuance transport and distribution of whole blood and packed red cells.
4. Compatibility testing of red cell units, if hospital based.

Blood Collection Unit (BCU)

1. Advocacy and promotion of voluntary blood donation and healthy lifestyle.
2. Recruitment, retention, and care of voluntary blood donors.
3. Screening and selection of voluntary blood donors.
4. Conduct of health education and counseling services.
5. Collection of blood (mobile or facility -based) from qualified voluntary blood donors.
6. Transport of blood to BC for testing and processing.
7. Compatibility testing of red cell units, if hospital based.

BLOOD BANK (BB)

1. Advocacy and promotion of voluntary blood donation and healthy lifestyle.
2. Storage and issuance of whole blood and blood components obtained from a BC.
3. The following services shall also be provided:
 - a. Compatibility testing of red cell units
 - b. Direct Coombs Test
 - c. Red cell antibody screening
 - d. Investigation of transfusion reactions
 - e. Assist the Hospital Blood Transfusion Committee (HBTC) in the conduct of post-transfusion surveillance (hemovigilance).
4. Hospital Blood Banks (Level 3 and 4) - The following services may be provided:
 - a. Recruitment, retention and care of Voluntary Non-Renumerated Blood Donors. (VNRBD)
 - b. Collection of blood (mobile or facility based) from qualified VNRBD
 - c. Conduct health education and counseling
 - d. Testing of units of blood for Transfusion-Transmitted Infection (TTIs).
 - e. Processing and provision of Whole Blood and blood components.

BLOOD CENTER (BC)

1. Advocacy and promotion of voluntary blood donation and healthy lifestyle.
2. Recruitment, retention, and care of voluntary blood donors.
3. Collection of blood (mobile or facility-based) from qualified voluntary blood donors.
4. Conduct health education and counseling.
5. Testing of units of blood for TTIs.
6. Processing and provision of blood components.
7. Storage, issuance, transport and distribution of units of whole blood and/or blood products to hospitals and other health facilities.

ANNEX C: 711 Healthline Service

Article II, Section 15 of the 1987 Constitution provides that “the state shall protect and promote the right to health of the people and instill health consciousness among them.” In the same vein, as outlined in Article XIII, Section 11 of the Constitution, it is also the policy of the state to “adopt an integrated and comprehensive approach to health development which shall endeavor to make essential goods, health and other social services available to all the people at affordable cost.”

Problems on referral and gatekeeping have always been a major challenge on every health system. Lack of proper referral has caused patients in hopping from one health care facility to the other in the hopes to find an appropriate facility that could cater one's health needs. With these problems in mind, Department of Health - Central Visayas Center for Health Development (DOH-CVCHD) was able to establish an electronic referral system known as the Central Visayas Electronic Health Referral System (CVe-HRS). In 2019, the referral system was piloted within Cebu Province specifically in the different DOH hospitals and Provincial Hospitals. In 2020, the COVID-19 pandemic has halted the expansion of the CVe-HRS to the different facilities and other provinces of Central Visayas.

In recent times, health-related issues, such as outbreaks and pandemics, have disrupted economic activities and affected man's quality of living, not just on a national but also on a global scale. While several health initiatives and systems were put up to respond to these situations, a concrete and viable solution addressing these problems still appears to be wanting in many regards. Particularly, it cannot be gainsaid that the lack of proper and adequate coordination of health and other essential services, intertwined with the varying mandates of the national and local governments, proves crucial in the most dire of health events, such as the COVID-19 pandemic.

At this time of pandemic, the uncertainty of COVID-19 left people clueless on traversing around within the health system. In order to cater to the countless queries of the general population, a dedicated 24/7 HealthLine was established within the Operations Center (OPCEN) of DOH CVCHD which is also in compliance with DOH Department Memorandum No. 0133, s. 2020 “Request for CHDs to Develop Call Center Coordination Units (CCUs) and Designate Point Person for Patient and Health Facility Referral”.

For Region 7, a local 711 HealthLine is adopted to fill in the gaps of the system. It establishes linkages between the citizenry in need of health services to the appropriate health service facility capable and duly efficient enough to assess and treat the identified health needs, among the many service and administrative operations it offers. However, despite the noblest of intentions it envisions, it cannot maintain and subsist as an effective system on its own without tapping the assistance of the other government offices.

By May 2020, Cebu City has exceeded the daily number of positive cases compared to National Capital Region (NCR). With the rising cases in Cebu it has caused the congestion in the different hospitals. Upon seeing the increase on the number of

COVID-19 admissions, especially in the major hospitals in the cities of Cebu, Lapu-Lapu and Mandaue, DOH – CVCHD decided to expand the current CCU to a 24/7 Emergency HealthLine with realtime bed tracking that will help navigate and coordinate the clients to the available health facility.

The Health Systems Development Section (HSDS) of DOH – CVCHD was mandated to spearhead the establishment of the HealthLine; currently this is now lodges together in for the CVCHD Emergency Operations Center under the Regional Health Emergency Management Service Section (RHEMS). The 24/7 HealthLine which eventually named as #0711 DOH-CVCHD HealthLine was piloted in Cebu Province with future plans of serving all provinces and Highly Urbanized Cities (HUCs) of Central Visayas. It is a call center setup operating 24/7 manned by trained personnel with medical background. When a person calls to seek emergency assistance, the navigator will assess the patient's status over the phone and determine the need for the urgency of referral to the nearby health facilities as appropriate. The command center initially catered to COVID-related concerns but eventually, covers all other types of healthline related calls. Operations started on 03 August 2020 using the temporary numbers (032) 411-6900 for landline and (+63) 9672219120 for mobile phone but currently using #0711 upon approval of National Telecommunications Commission (NTC) and telephone companies for the said hotline number.

Furthermore, DOH – CVCHD aims to sustain this initiative even after the pandemic. The expansion of the system is also in line with the referral mandates for the implementation of Universal Health Care Law in the region. The need for continuous innovation and engagement of various stakeholders from the government and private sectors is essential to expand the services of the CVe-HRS & 711 DOH-CVCHD HealthLine.

With these in mind, and in order to streamline and coordinate the collaborative efforts among the concerned agencies and offices, the proposal to institutionalize a 711 HealthLine as a nationwide hotline number for health services and information and other purposes, comes in as a vital component in the health service delivery.

Hence, the 711 Healthline institutionalization also bill seeks to ease the challenges faced by the general public in accessing quality, affordable and timely services for their health care needs. This is possible through the establishment of a dedicated 24/7 HealthLine that is competent, responsive, and well-equipped to respond to the healthcare needs of its clientele; As the say, navigating the patient is to “refer the right patient to the right facility, at the right time, all the time” (Dr. G. Perez. CVHRS Manual)

ANNEX D: Electronic Health Referral System Interface

The Central Visayas Electronic Health Referral System (CVe-HRS) is a web-based system that uses a stable internet connection and can be accessed through any computer, laptop, tablet or mobile phones with google services.

A. START-UP AND LOGIN A.I. Log in IT User Account:

To start, open the browser in your device and go to the Department of Health Region 7 Portal <https://mis.cvchd7.com/portal> and click **REFERRAL page** or you may go to <https://cvchd7.com/login>. You will arrive at the Login Page and will be asked for your login credentials.

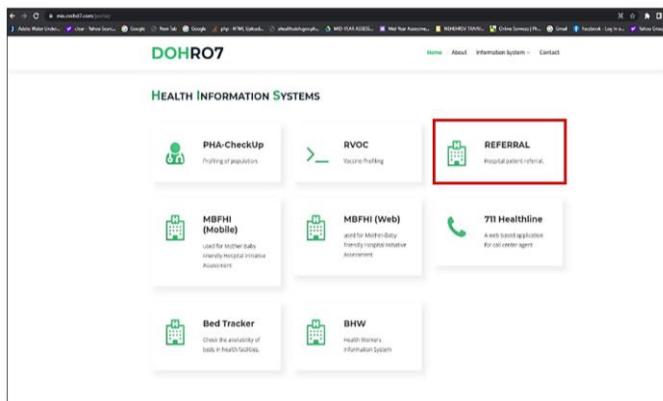

Figure 1. Screenshot on DOHRO7 Portal.

A.I.1. Log-in IT/ Admin Credentials:

- For Hospitals and Birthing Homes EMS and other pre-hospital partners: Please acquire your login credentials from your IT department or any CVe-HRS Point Person.
- For RHUs: Please acquire your login credentials from your respective CVe-HRS NDP Point Person.

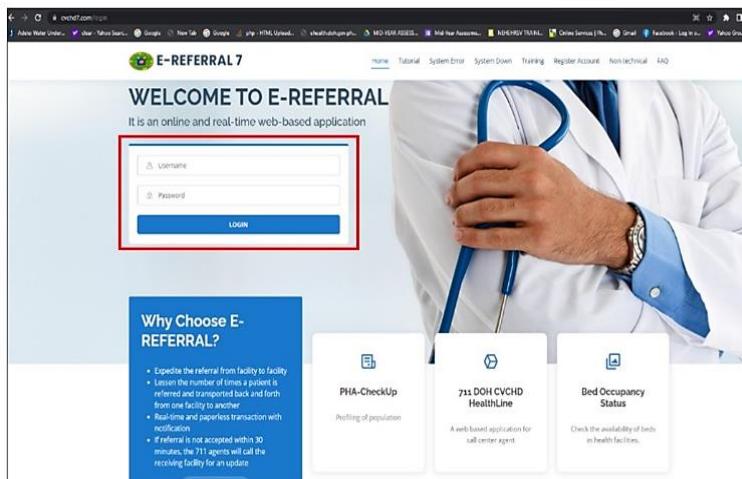

Figure 2. Screenshot on CVe-HRS Login Page.

A.I.2. Create New User's Account:

- Allows the IT personnel to create a User ID to access CVe-HRS.
- To add a new CVe-HRS new user account, click  Add User menu and  button.

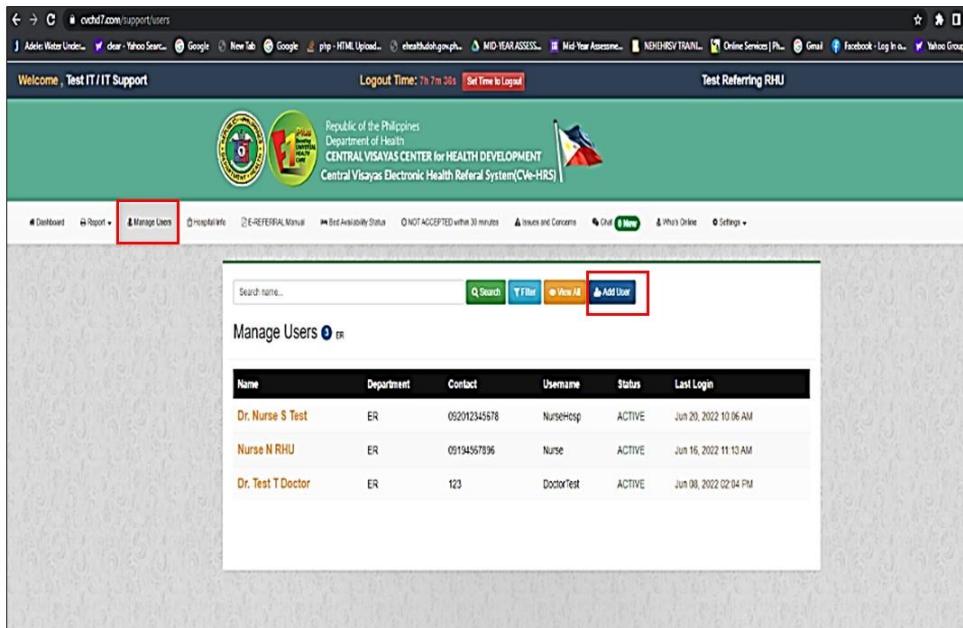

Figure 4. Screenshot on CVe-HRS Add User Page

A.I.3.To Edit/ Update User's Account

- To edit a certain User Account, input the user's name on the **search box** and click  button, select desired username. Enter the necessary changes, and then click the  button, for changes to take effect.
- To undo editing of an existing user account, click on the  button.
- To **DEACTIVATE** user's account, under the "status" field please select the **INACTIVE** function from the drop-down list.

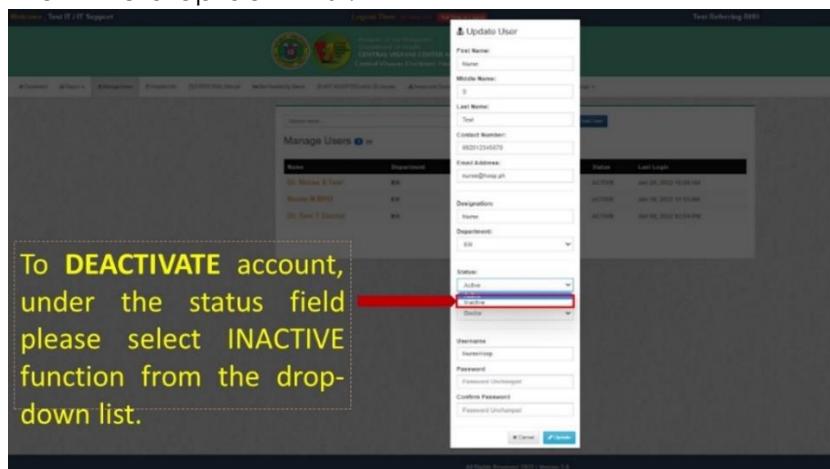

Figure 5. Screenshot on CVe-HRS Update User Page

B. REFERRING A PATIENT

B.I.1. Log in Credentials:

- Log in your account.

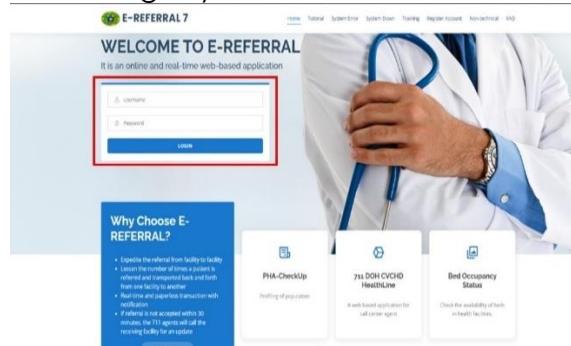

Figure 6. Screenshot on CVe-HRS Login Page.

B.I.2. Once logged in, you will be directed to the **menu** where you can see your monthly activity of referred, accepted, and redirected referrals.

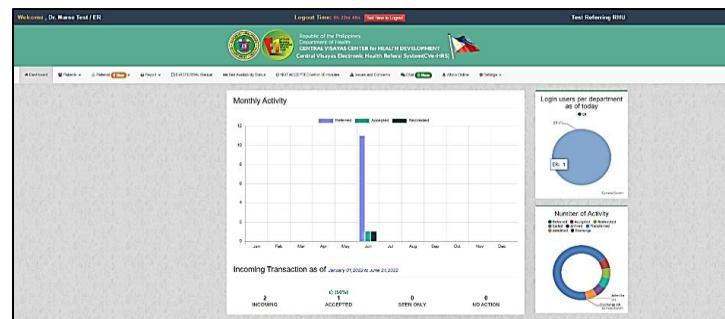

Figure 7. Screenshot on CVe-HRS Dashboard Page

B.I.3. Adding or Searching Patient:

- Click on the **menu**, select from the drop-down list.
- **List of Patients-** Consists of a search bar that lets you search a patient when you are making a referral.

Figure 8. Screenshot on CVe-HRS Patient's Drop-down List Page.

B.I.4. The **Filter** button allows you to search specific individuals based on their Name, Region, Province, Municipality/ City and Barangay. If one is missing, it will not filter.

B.I.5. If the “Patient not found” dialog appears, click **Add Patient** button to add the patient's information.

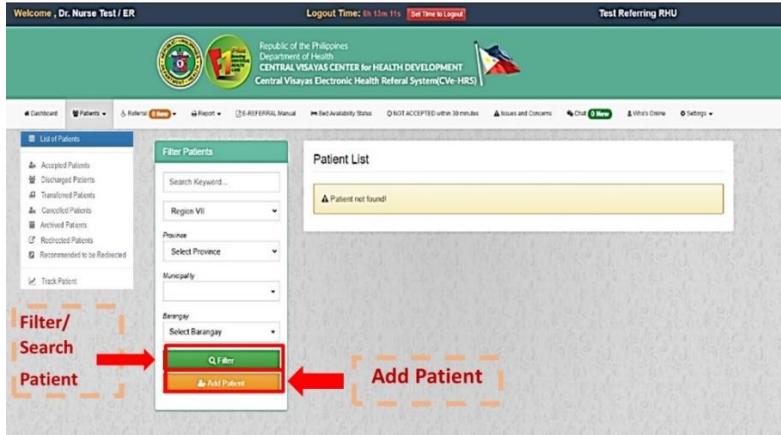

Figure 9. Screenshot on CVe-HRS List of Patient's Page

B.I.6. Fill-out the patient's profile form and click the **Submit** button. To undo adding a new patient profile, click on **Back** button.

Figure 10. Screenshot on CVe-HRS Add New Patient's Page

B.I.7. Once submitted, the created patient profile appears Option 1: click the

Refer button to view the referral form where you can enter patient details and other pertinent information. Option 2: Click the **Walk-In** button for walk-in patient/ offline referrals, those who are not in the system but were referred from a facility.

Note: To tag the patient as Walk-in referral, you may use the same process as “Selecting or Creating a Patient” but you will choose the **Walk-In** button beside the **Refer** button and fill-out the clinical referral form.

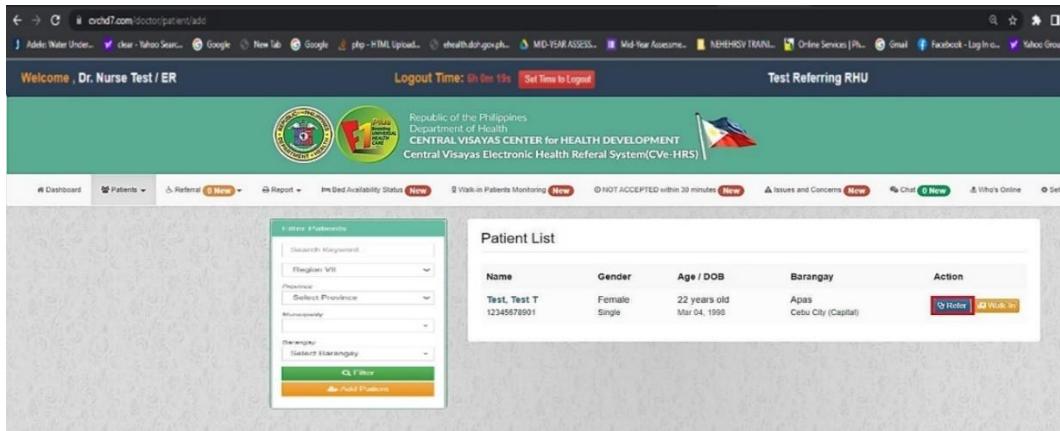

Figure 11. Screenshot on CVe-HRS Patient's Action Page

B.I.9. After clicking the **Refer** button, (female patient only) a pop-up dialog window will appear where you need to choose if the patient is “**Pregnant**” or “**Non-Pregnant**”, after choosing you will be redirected to a clinical referral form wherein you will fill-out pertinent details of the referral. Once accomplished, click the **Submit** button.

Option 1: Free to input other ICD-10 diagnosis.

Option 2: Search ICD-10 Code from the drop-down list.

Figure 12. Screenshot on CVe-HRS Clinical Referral Form Page.

B.I.9. To view the referral submitted by your facility.

Click the **Referral** menu and select **Referred Patients** from the drop-down list to **TRACK** the patient that has been referred to another facility.

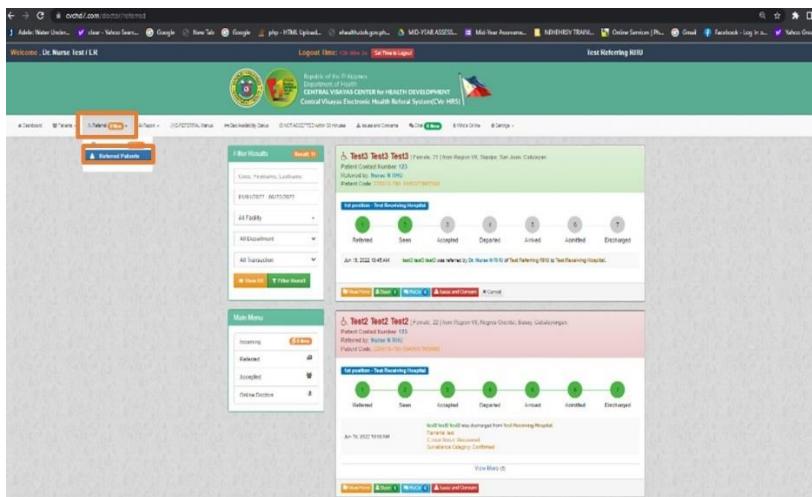

Figure 13. Screenshot on CVe-HRS Referred Patient's Page.

[View Form] Button – to view the “**Clinical Referral Form**” where you can print and edit the form.

Note: Whoever encodes the patient’s “clinical referral form” is the only one who can edit the form, you can no longer edit or make any changes after the patient is **accepted**.

[Seen 1] Button – to see the records of those who have already viewed the clinical referral form.

[ReCo 0] Button – to deliver a message to the receiving facility.

[Issue and Concern] Button – to input some issues and concern regarding the receiving facility.

[Redirected 1] Button – let you know that the patient has been redirected/ rejected.

[Cancel] Button – to cancel the patient’s referral.

C. ACCEPTING AND REDIRECTING A REFERRAL

C.I.1. A notice message  KRYSSTELLE MARIZZ DIONES was referred by Dr. Nurse Test of Test Referring RHU

and alert tone will be sent to the facility in the event of an incoming referral.

C.I.2. Go to the  **Referral**  **menu** and click   from the drop-down list. It will direct you to the list of incoming referrals. A new referral is determined by its color green background.

Note: Incoming patients referred to a particular department can only be accepted by those registered doctors who are assigned in that department. (Example: An OB doctors cannot accept an IM referral).

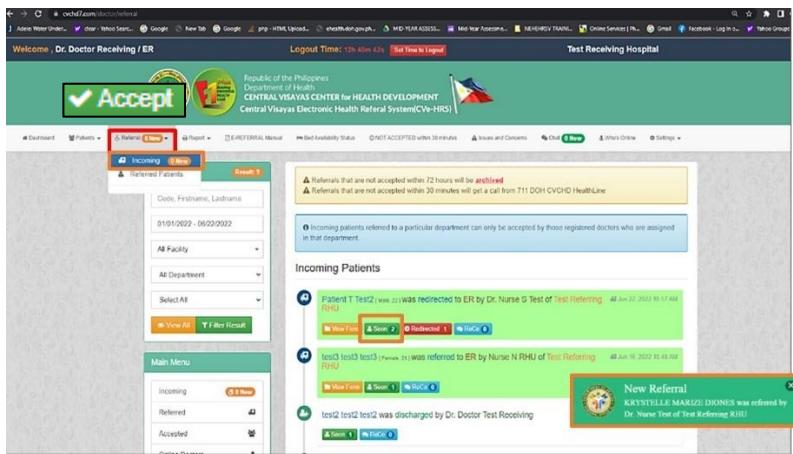

Figure 14. Screenshot on CVe-HRS Patient's Incoming Referral Page.

C.I.3. Click the **View Form** button to see a patient's referral **✓Accept**

C.I.4. After clicking the **View Form** button, you will be directed to a patient's clinical referral form. Once viewed, it will be marked as "Seen" at the other end of the referral.

- In viewing the **Referral Form**, the following buttons are available:

✓Accept Button

- Enables users to accept referral from other facility/ies.

Recommend to Redirect Button

- Enables users to recommend or refer the patient to another facility.

Call Request Button

- Enables the users to notify the referring facility to make a call to the receiving facility to further discuss pertinent patient information.

Print Form Button

- Allows users to print out the form.

C.I.5. If you want to accept a referral, you may click the **✓Accept** button and add remarks once referral has been accepted.

Figure 15. Screenshot on CVe-HRS Referral Option Page.

C.I.6. To view the accepted patient's list, click the **Patients** menu and select **Accepted Patients** from the drop-down list. There you can also notice five active buttons as follows:

Referring Facility	Patient Name/Code	Date Accepted	Current Status	Action
Ref Referring (10)	Patient T Test	June 22, 2022 02:14 PM	ACCEPTED	
Ref Referring (10)	AOL Hospital National	June 22, 2022 11:40 AM	ACCEPTED	
Ref Referring (10)	Maria Theresa Escalante	June 22, 2022 11:44 AM	ADMITTED	
Ref Referring (10)	Miriam Agape Llanera	June 22, 2022 11:58 AM	ACCEPTED	
Ref Referring (10)	Alena Tunda Estacion	June 22, 2022 11:58 AM	ARRIVED	
Ref Referring (10)	JAYNE Day, Jenice Coronado	June 23, 2022 11:56 AM	ACCEPTED	
Ref Referring (10)	UAY UAY UAY	June 23, 2022 11:55 AM	ACCEPTED	
Ref Referring (10)	Ref Referring (10)	June 10, 2022 10:30 AM	ACCEPTED	
Ref Referring (10)	Patient T Test	June 13, 2022 10:50 AM	ARRIVED	

LEGEND:

- Admitted
- Discharged
- Transfer Patient

Figure 16. Screenshot on CVe-HRS Accepted Patients Page

LEGEND:

Patients Arrived Button

- Enables the user to record the exact time of arrival of the referred patient and notifies the referring facility.

Patient Didn't Arrive Button

- The patient did not arrive for at least 8 hours after accepting the referral.

Patient Admitted Button

- Enables the user to record the date and time of admission and notifies the referring facility.

Patient Discharged Button

- Enables the user to record the date and time of the discharge and notifies the referring facility.

Note: Choose this option if a patient will be discharged or discharged without admission.

Transfer Patient Button

- Enables a user to refer/ transfer the patient to another facility/ies.

ADDITIONAL INFORMATION:

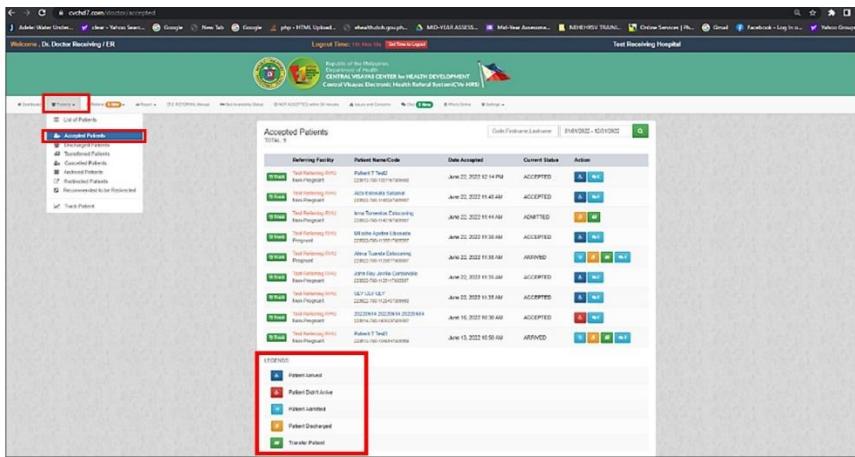

Figure 17. Screenshot on CVe-HRS Patient's Referral Option Page.

 **Patients** ▾ **MENU**

 **List of Patients**

- Consists of a search bar that lets you search/ add a patient when you are making a referral.

 **Accepted Patients**

- Consists of a list of patients accepted by your facility and its corresponding details.
- You may search a patient-by-patient code, first name or last name and you can also filter the date.
- Once you click on a patient's name, the corresponding clinical referral form appears.

 **Discharged Patients**

- Consists of a list of patients discharged from your facility and its corresponding details.

Note: That this is different from the normally discharged patients from the wards.

- You may search a patient-by-patient code, first name or last name and you can also filter the date.
- Once you click on a patient's name, the corresponding clinical referral form appears.

 **Transferred Patients**

- Consists of a list of patients being transferred to another and its corresponding details.
- You may search a patient-by-patient code, first name or last name and you can also filter the date.
- Once you click on a patient's name, the corresponding clinical referral form appears.

Canceled Patients

- Consists of a list of referrals canceled by your facility and its corresponding details.
- You may search a patient-by-patient code, first name or last name and you can also filter the date.
- Once you click on a patient's name, the corresponding clinical referral form appears.

Archived Patients

- Consist of a list of referrals that have been automatically archived due to inactivity after 72 hours. Inactivity means no action was done when the referral was submitted.
- You may search a patient-by-patient code, first name or last name and you can also filter the date.
- Once you click on a patient's name, the corresponding clinical referral form appears.

Track Patient

- Enables you to track a particular patient's referral or its, once you provide the patient code.

Figure 18. Screenshot on CVe-HRS Referral Option Page.

Referral 6 New MENU

Incoming

- Consists of a list of incoming referrals to your facility and corresponding actions made.
- You may search a patient-by-patient code, first name or last name and you can also filter the date.

Referred Patients

- Consists of a list of outgoing referrals from your facility and corresponding actions made. You may also view and check the referral pathway of each referral.

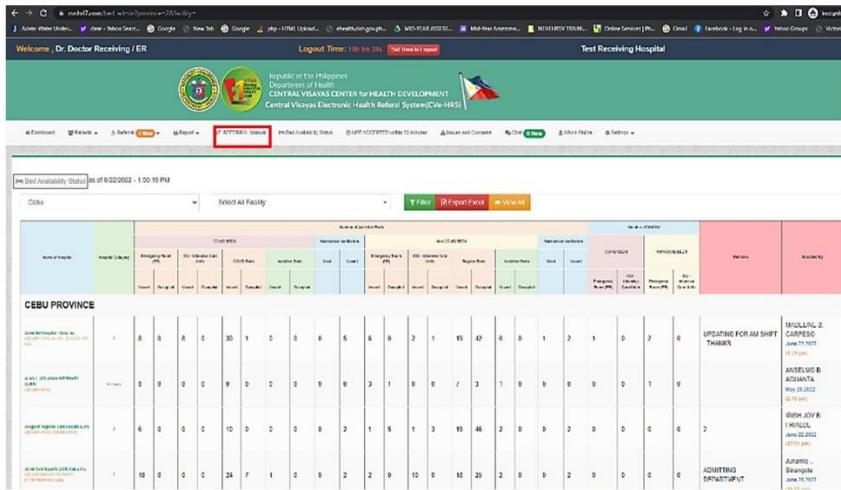

Figure 19. Screenshot on CVe-HRS Bed Availability Status Page.

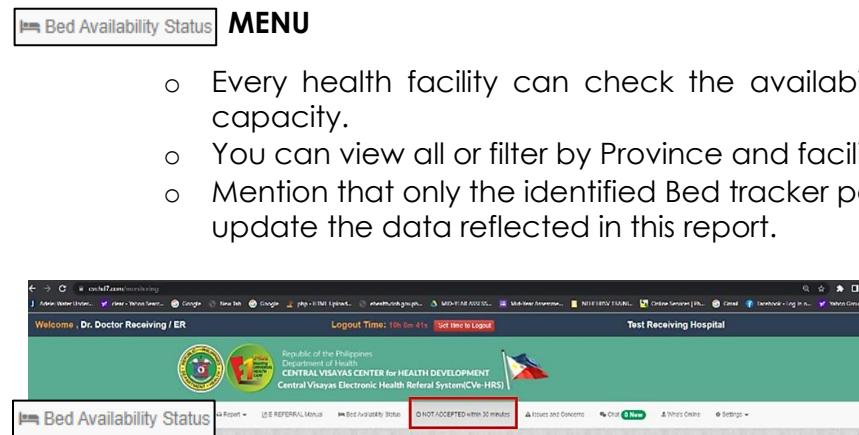

Figure 20. Screenshot on CVe-HRS Not accepted within 30 minutes Page.

- Bed Availability Status MENU**
 - Every health facility can check the availability of bed status and bed capacity.
 - You can view all or filter by Province and facility name.
 - Mention that only the identified Bed tracker point person/s per facility can update the data reflected in this report.
- NOT ACCEPTED within 30 minutes MENU**
 - Consist of a list of patients who are not accepted within 30 minutes or more by the health facilities and with corresponding remarks.
 - You can filter by date range.
 - Enables you to track a particular referral once you click the **patient code**.
 - If a referral has not been attended for 30 minutes from the time it was submitted, 711 contacts the receiving facilities for them to check and update the referral.

Figure 21. Screenshot on CVe-HRS Who's Online Page

- Who's Online MENU**
- Shows you a grid view of doctors and other focal health workers from all participating facilities who are online and their status (on-duty or off-duty). This also shows you the specific contact number of each doctor and their assignments.

ANNEX E: DOH Telemedicine

PROCESS WORKFLOW

- From BHU, RHU, MHU or CHO > patient(s) will be scheduled for a clinic visit
- From BHU, RHU, MHU or CHO > patient(s) will be scheduled for a clinic visit appointment through the EMR system.
- If the patient needs further testing or needs to see a specialist > BHU, RHU, MHU, CHO will refer the patient to a specialist from any of the affiliated hospitals and an e-consultation appointment will be scheduled. The e-consultation appointment will happen at the patient's BHU, RHU, MHU, CHO.
- The specialist from the hospital will conduct the e-consult appointment and will check the patient virtually with the use of the EMR system. The patient is guided by the BHU, RHU, MHU, CHO staff during the e-consultation. Prescriptions and other letters done during the e-consultation will be released in the BHU, RHU, MHU or CHO.

Inside the Electronic Medical Record (EMR) System

Login

Access the EMR website and login: <https://emr.cvchd7.com/login>

Patient Registration

1. To register and add patients, click the **Add Patient** button. Or you can go to the **Patients** module on the left menu and click the **Add Patient** button.

Patient Search

2. To search for a patient record, go to the **Patients** module. Make sure to enter the patient's correct information and fill out all the required fields for the system to retrieve the patient's records.

Scheduling a patient for a clinic visit

3. To schedule a clinic visit, go to the appointment form below the calendar on your **Cloudpanel** screen.
4. Select **Add Clinic visit**, and search for the patient record.
5. The search form window pops up. Make sure to enter the correct and full details of the patient. Then click the search button. It will populate on the scheduling form once the patient record is retrieved.
6. You can update the **date and time** details as well.
7. Once done, click the Notify patient via SMS, and click **Save** to successfully schedule the patient.

Inside the Visit Note/Clinic visit appointment

8. To start the appointment, click the **Add Note** button on the patient's appointment.

9. Use the Navigation bar at the right side of the screen. Click on a widget you want to access and add details on.
10. Just type and fill out the widgets and click save/submit/done. If there is none, it will automatically be saved once you click on any white space outside the widget.
11. For the prescriptions/orders/letters, a **printer icon** at the top right of the corresponding widgets is for print preview - you can preview, print and/or download.

Referral to a hospital

12. Select the **Referral widget**, and select from the lists of doctors, filtered by location and specialization.

Finish the appointment

13. Once done, click the **Clinic Visit options** button at the bottom right, and select **Checkout** to finish and close the appointment.

Track referrals

1. To track **outbound referrals** to another facility, click the **cloud** icon at the top right and a pop-up window will display.

Receive referral requests

1. To check and approve inbound referral requests, click the **cloud** icon at the top right.
2. Go to **Inbound referrals**, and click the patient's name on the left.
3. Click **Approve Request** to approve the consultation request with the patient.
4. You also have the option to view the patient's **medical records** before approving the request.

E-consultation with the hospital

1. Once the hospital approves the request, the BHU, MHU, RHU, CHO will be the one to set up and access the appointment.
2. On the day of the appointment, the patient will be contacted to visit their BHU, MHU, RHU, CHO for the e-consultation.
3. To start the e-consultation with the specialist, the staff at the BHU, MHU, RHU, CHO will login and retrieve a **virtual room code** which is generated for every e-consultation appointment.
4. The code will be used and pasted on this website:
<https://telemed.cvchd7.com/virtualroom/index.html>
5. Click **Enter Virtual Room**, and the consultation/call will start once the doctor enters the virtual room.

Inside the E-consultation appointment (doctor's view)

1. To start the appointment, click the **Add Note** button on the patient's appointment.
2. To start the session, click on the **Call Patient** button.

3. You can immediately start documenting the applicable widgets (**SOAP forms**) while interacting with the patient.
4. The following widgets (SOAP forms) are automatically populated from the patient's Appointment Request details.
 - CC/HPI
 - Medication History
 - Allergies
 - Vitals Signs and Measurement
 - General Attachments Section of the Patient's File (images and PD)

Finish the e-consult appointment

1. Once done, click the **E-consult options** button at the bottom right, and select **Checkout** to finish and close the appointment.
2. The letters and printouts during the e-consultation will be accessed by the BHU, RHU, MHU and CHO. They will be accessing it through their logins and will print it for the patient to bring after.

Appointment request via hospital portal

1. Patients will access the hospital's portal. From the portal, a pop-up window containing the privacy agreement appears. Make sure to **read and agree to the Terms and Conditions, and Privacy Policy** before hitting **Proceed**.
2. Fill out the registration details correctly. The purpose of the appointment request is also required.
3. They will be asked for an OTP via sms. Once done, patients can activate their account, or they will just wait for the request to be approved.

Receive appointment requests via portal

1. The secretary logs in of each portal and can access and approve the requests. They need to log in to their accounts.
2. Click the **cloud** icon at the top right and a pop-up will appear. Go into the appointment requests tab and click on the patient's name on the left.
3. You can click and view the medical records, then approve the request.
4. Once you click the **Approve** button, a form will pop up. Fill it out with the preferred appointment details. You can also assign any available doctor within the facility.
5. Once approved, it will be removed on the request tab and will be accessible on the cloudpanel. It will be on queue on the approved date.
 - a. It will be shown on the secretary accounts and on the assigned doctor.
 - b. Doctor will login to the EMR system through his/her logins.
6. To start the e-consultation, click the **Add note** button. It will be the same experience for any e-consultation appointments.

04 March 2021

COMMITTEE MEMORANDUM ORDER No. 08, S. 2021

SUBJECT: COMPOSITION OF THE DOH CV CHD e REFERRAL TECHNICAL WORKING GROUP AND ITS ROLES AND FUNCTIONS

To effectively implement the Universal Health Care in Central Visayas, the following are hereby designated as members of the UHC eReferral Technical Working Group (TWG). They shall work on the sustainability and effective implementation of the electronic referral system and put in place the mechanisms, procedures and integration of the apps to fully operationalize the system in all health facilities.

COMPOSITION:

Chairman :	Dr. Jera C. Armendarez	MOIV, HFDS
Vice Chairman:	Dr. Nelner Omus	MO IV, HSDS
Members :	Dr. Eugenia Mercedes R. Cañal Dr. Shelbay C. Blanco Dr. Annessa Patindol Ms. Jane Michelle Raagas Ms. Chevroleta Deiparine Ms. Ligaya Moneva Mr. Garizaldy Epistola .	MO IV, RESU MO IV, HEMS MO IV, RLED DMO IV, HSDS Nurse V, HIRDS HEPO III CMT III, ICTU

ROLES AND FUNCTIONS:

❖ Health Facility Development Unit

- Facilitate the Electronic Referral Activities involving all health facilities
- Coordinate and invite the health facilities pertaining to E-referral activities e.g. orientation / re-orientation, trainings and meetings
- Take action of all complaints relative to the Electronic Referral System
- Serve as implementing arm in carrying out the directions of the TWG

❖ Regional Epidemiology and Surveillance Unit / Health Emergency Management Service

- Spearhead the ambulance dispatch being requested as part of the E-Referral System
- Manage the communication network and referral system to assist client for navigation to appropriate health facilities;
- Directly supervise all 711 Healthline personnel as a branch of DOH CVCHD Operation Center
- Consolidate reports and conduct evaluation for further improvement of services

CERTIFIED PHOTO COPY

❖ Health Systems Development System

- Act as secretariat of the eReferral Technical Working Group
- Institutionalize localized Healthcare Provider Network (HCPN) upon the direction of the Universal Health Care
- Ensure HCPN are onboard the eReferral System
- Conduct reviews and readiness tests, monitor and evaluate the overall capabilities of various aspects of the program
- Develop and sustain training programs for the personnel involved in the program

❖ Health Information System

- Coordinate with IT personnel on the appropriate graph to be used for data presentation
- Analyze data generated from the received calls on a daily, weekly and monthly basis
- Give recommendations based on the analyzed data

❖ Information Communication and Technology Unit

- Install all necessary IT infrastructure components, which include servers and related hardware, systems software and the like
- Recommend IT infrastructure specifications at the client and server levels
- Ensure efficient and up to date IT infrastructure security at the Server and Data Center Level
- Monitor and conduct preventive and corrective maintenance to all relative hardware components
- Ensure timely back up and restoration of data and provide system fix
- Monitor system performance and accessibility

❖ Regulation, Licensing and Enforcement Division

- Monitor compliance on the use of electronic medical record and eReferral platform;
- Ensure that all health facilities are on board to the eReferral Systems;
- Issue Notice of Violations (NOV) for non-compliant facilities

❖ Health Promotion and Communication Unit

- Facilitate the posting of approved communication materials as E-referral aligned with developed communication plans from the appropriate offices
- Provide technical assistance to health promotion initiatives aligned with the E-referral program/communications
- Cascade the ERS Information, Education and Communication (IEC) materials to the designated Health Education and Promotion Officers (HEPOs) in Local Government Units (LGUs), DOH Hospitals and others concerned and ;
- Administer management of social media platforms pertaining to ERS promotion activities and projects.

The tasks given as stipulated above shall be part of the regular function of the respective offices and shall take effect immediately upon approval. This Order shall be valid until revoked by the undersigned.

In addition, the Committee shall hold a monthly meeting or as the need arises.

For strict compliance.

JAIME S. BERNADAS MD, MGM, CESO III
Director IV

SERIALIZED, PHOTOCOPIED
